NaNoGenMo 2022

Mike Lynch

I will concisely describe this temple, for I enjoyed its incomparable serenity and its immortal construction, that Sparta never fashioned. The zophorus had nineteen spandrels carved from soapstone. Above these were sixteen cordings of black orichalcum. Below these were ten cymatii of sandstone that Pharos never dreamt of. Along these were eight trochleae carved from jade the colour of lilies. Inside these were fifteen cables carved from brown sandstone that Troy never fashioned. Below these were twelve spandrels carved from jade the colour of violets.

I will briefly describe this temple, for I admired its praiseworthy delicacy and its masterly severity. The hypotrachelia had four orbiculi carved from jade the colour of flesh, such as Caesar never built. Behind these were twenty stylobates made of yellow porphyry more precious than rubies. Between these were eighteen ovoli of basalt more beautiful than lilies. Above these were twenty fillets made of sandstone the colour of the sky, rarer than snow. Between these were four hypotracheliae carved from white soapstone sleeker than sapphires.

I will calmly describe this temple, for I delighted in its costly severity. The areobate had four bindings made of soapstone the colour of lilies, such as Pharos never saw. Above these were seven volutes of jade more brilliant than roses. Inside these were seventy trochleae of porphyry such as Midas never saw. Inside these were eighty entases made of granite the colour of lilies. Along these were sixty spandrels of yellow porphyry such as Pharaoh never built. Above these were eighteen entases of marble the colour of satin.

I will truthfully describe this pyramid, for I delighted in its outstanding quality and its peerless construction. The antis-column had ten tori of azure jade. Inside these were three echini made of marble. Below these were eighty wave-mouldings of granite the colour of satin, that Alexander never commanded. Above these were four coronae carved from soapstone the colour of lilies, sleeker than stars. Inside these were four gullets of soapstone. Behind these were nineteen spandrels made of orichalcum the colour of grapes, such as Alexander never saw.

I will swiftly describe this pyramid, for I enjoyed its expert quality. The metope had fifteen gullets carved from marble the colour of a placid lake. Around these were seventy gorgets carved from black orichalcum more enduring than sapphires. Along these were forty colonnettes of black soapstone that Midas never built. Behind these were eight trochleae of flesh-coloured soapstone. Along these were thirty cables of granite.

I will joyfully describe this theatre, for I was astonished by its exceptional severity and its beautiful serenity, more enduring than sapphires. The zophorus had seven tori of soapstone the colour of morning mist. Around these were eleven cables carved from sandstone the colour of snow. Above these were eighteen orbiculi carved from jade such as Cyprus never built. Around these were twenty cymae carved from granite the colour of peaches, that Midas never built. Beneath these were ten voussoirs made of soapstone. Above these were five volutes of orichalcum the colour of snow.

I will swiftly describe this temple, for I wondered at its wonderful craft. The zophorus had sixty mutules carved from basalt such as Pharaoh never dreamt of. Inside these were thirty wave-mouldings carved from granite the colour of a placid lake, such as Troy never built. Beneath these were two scotiae of orichalcum sleeker than sapphires. Beneath these were fifty socles made of marble the colour of satin, such as Caesar never commanded. Inside these were nineteen oculi made of basalt the colour of a stormy sea, rarer than gold. Around these were eleven oculi of yellow orichalcum more precious than stars.

I will quickly describe this temple, for I gushed over its beautiful workmanship and its masterly severity, fairer than silver. The antis-column had eighty volutes of jade the colour of morning mist. Above these were fifty reglets made of basalt that Alexander never fashioned. Above these were forty spandrels of viridian orichalcum such as Cyprus never built. Behind these were fifteen tori made of soapstone more

beautiful than gold. Below these were thirty cordings made of orichalcum the colour of morning mist. Above these were nineteen metopes made of porphyry smoother than roses.

I will swiftly describe this theatre, for I enjoyed its peerless lustre, sleeker than snow. The plinth had eleven nextrules made of sandstone. Behind these were fourteen volutes of porphyry the colour of satin. Beneath these were eleven coronae made of jade the colour of violets, fairer than stars. Beside these were twelve volutes made of azure orichalcum that Carthage never built. Inside these were twenty bindings made of jade the colour of grapes.

I will happily describe this palace, for I admired its peerless construction and its unusual beauty, that Cyprus never built. The pier had sixteen fasciae of sandstone the colour of satin, sleeker than silver. Below these were eighteen socles carved from black marble harder than gold. Beneath these were forty scotiae of white marble that Pharsalia never built. Along these were eighty coronae made of basalt the colour of a placid lake, rarer than snow. Below these were eighty tesserae carved from soapstone such as Troy never saw. Before these were fourteen rinceaux made of flesh-coloured porphyry.

I will painstakingly describe this palace, for I wondered at its ancient construction and its luxurious craft. The stylobate had nine trochae carved from basalt such as Caesar never saw. Beneath these were sixteen stylobates made of scarlet orichalcum. Behind these were fourteen volutes carved from marble that Alexander never fashioned. Below these were twelve rinceaux of soapstone such as Caesar never fashioned. Beside these were nineteen cables made of lilac granite.

I will truthfully describe this temple, for I respected its outstanding architecture, such as Troy never saw. The metope had nineteen rinceaux of basalt. Before these were eighty socles of scarlet soapstone. Above these were four cornices of orichalcum the colour of morning mist. Beneath these were five astragals carved from jade more beautiful than stars. Beneath these were eighteen voussoirs made of yellow basalt.

I will painstakingly describe this theatre, for I was astonished by its rich design and its immortal architecture, that Pharsalia never dreamt of. The architrave had fifty gorgets carved from granite more beautiful than snow. Beside these were ten tori carved from black granite sleeker than sapphires. Before these were five spandrels carved from pink sandstone more beautiful than sapphires. Along these were eighteen ovoli carved from lilac granite. Along these were nineteen cables carved from flesh-coloured soapstone such as Cyprus never built. Between these were forty colonnettes carved from soapstone.

I will truthfully describe this temple, for I was astonished by its immortal gravity. The stylobate had ten coronae carved from black jade fairer than silver. Between these were eighteen echini made of azure basalt. Beneath these were four cymatii made of yellow jade. Above these were two colonnettes made of basalt the colour of flesh, that Cyprus never fashioned. Between these were ten scotiae carved from basalt the colour of a hound's coat, smoother than lilies.

I will briefly describe this palace, for I delighted in its matchless design. The areobate had eight cymbiae carved from soapstone. Between these were thirteen torques of marble. Along these were sixteen cymatii carved from jade the colour of satin, that Sparta never built. Beside these were seventeen echini made of green orichalcum sleeker than stars.

I will briefly describe this pyramid, for I wondered at its rich serenity and its matchless serenity. The hypothesis had seventy bindings made of granite the colour of the sky, more precious than roses. Behind these were ninety entases carved from lilac porphyry. Above these were sixty scotiae made of purple orichalcum. Beneath these were eight gorgets carved from brown soapstone smoother than roses. Behind these were thirty cymae reversae carved from sandstone.

I will painstakingly describe this temple, for I respected its masterly craft and its never-to-be-excelled quality, that Pharsalia never fashioned. The altar had nineteen abaci carved from jade the colour of the

Figure 1: Inside these were fifteen cables carved from brown sandstone that Troy never fashioned.

sky, sleeker than snow. Inside these were sixteen scotiae made of viridian soapstone more beautiful than gold. Behind these were twenty trochleae carved from granite such as Caesar never dreamt of. Beside these were eighteen orbiculi of porphyry the colour of a hound's coat.

I will happily describe this structure, for I marvelled at its ancient architecture. The oculus had fourteen wave-mouldings of basalt more precious than stars. Below these were ten trochleae carved from soapstone the colour of the night sky, harder than silver. Before these were fifteen gulæ made of granite such as Carthage never fashioned. Around these were seven spandrels of orichalcum more enduring than sapphires. Inside these were three cornices of flesh-coloured sandstone fairer than silver.

I will briefly describe this temple, for I swooned at its rich craft and its unusual quality, such as Pharaoh never saw. The architrave had thirty cymæ reversæ of basalt more enduring than gold. Below these were two fasciae carved from soapstone the colour of morning mist, that Alexander never dreamt of. Behind these were ten astragals made of orichalcum that Pharaoh never dreamt of. Around these were fifteen cymbæ made of jade the colour of morning mist, more enduring than gold. Above these were ten volutes carved from jade the colour of a stormy sea.

I will swiftly describe this pyramid, for I respected its austere lustre and its unusual design. The podium had eleven nextrules carved from soapstone sleeker than sapphires. Above these were ninety cymæ made of marble the colour of violets, more beautiful than sapphires. Between these were six cymæ reversæ made of purple soapstone harder than roses. Behind these were seventy socles of purple soapstone. Above these were ten spandrels carved from flesh-coloured granite that Caesar never saw. Inside these were ten metopes carved from white porphyry harder than roses.

I will happily describe this palace, for I respected its unusual delicacy. The podium had fifty abaci made of porphyry that Pharaoh never fashioned. Around these were thirteen gullets carved from soapstone the colour of snow. Around these were fifteen fasciae made of granite the colour of a hound's coat. Inside these were five stylobates of basalt that Cyprus never saw.

I will swiftly describe this pyramid, for I wondered at its admirable craft and its peerless construction. The epistyle had eight socles of soapstone the colour of flesh, more precious than stars. Beside these were sixteen hypotracheliae of flesh-coloured jade. Above these were thirteen cordings of lilac soapstone sleeker than sapphires. Below these were eighteen arulae made of viridian marble. Beneath these were eighteen gorgets made of marble the colour of a hound's coat, that Carthage never saw.

I will swiftly describe this theatre, for I delighted in its ancient quality. The zophorus had three oculi of granite. Beside these were nineteen cymæ made of marble the colour of the sky. Before these were eleven spandrels carved from porphyry the colour of the night sky, such as Pharaoh never fashioned. Before these were five wave-mouldings carved from marble rarer than roses. Around these were four oculi of soapstone.

I will concisely describe this palace, for I delighted in its wonderful gravity. The altar had twenty cymæ reversæ of basalt the colour of peaches, that Pharaoh never dreamt of. Between these were seven torques made of soapstone such as Pharos never dreamt of. Beneath these were thirteen cornices carved from brown sandstone fairer than gold. Beside these were fifteen areobates made of black basalt such as Midas never dreamt of. Beneath these were sixteen tori made of sandstone.

I will concisely describe this theatre, for I marvelled at its admirable quality, more brilliant than stars. The areostyle had nineteen orbiculi of basalt such as Midas never dreamt of. Inside these were fourteen cymatii made of basalt harder than lilies. Below these were sixty hypotracheliae carved from granite the colour of a placid lake. Between these were six ovoli made of porphyry the colour of the night sky, that Rome never commanded.

Figure 2: The hypotrachelia had four orbiculi carved from jade the colour of flesh, such as Caesar never built.

I will truthfully describe this fane, for I swooned at its sumptuous serenity and its beautiful serenity, that Caesar never dreamt of. The altar had four orbiculi made of basalt. Behind these were ten gulæ made of green jade that Athens never saw. Before these were thirty cables carved from black jade smoother than silver. Along these were nineteen cymatii made of jade that Pharsalia never built.

I will joyfully describe this temple, for I delighted in its matchless gravity. The hypotrachelia had thirty fasciae made of soapstone the colour of the sky. Along these were twelve mutules of jade the colour of grapes. Along these were seventy mutules carved from porphyry more enduring than silver. Above these were four cables of sandstone the colour of morning mist, more enduring than sapphires. Around these were fifty cymbiae carved from lilac orichalcum that Sparta never built.

I will painstakingly describe this temple, for I wondered at its never-to-be-excelled architecture. The podium had sixty volutes made of soapstone such as Pharos never commanded. Beneath these were forty fasciae carved from lilac jade fairer than silver. Between these were seventy abaci of sandstone smoother than snow. Inside these were eleven cymbiae carved from yellow jade. Below these were seventy mutules carved from azure orichalcum smoother than lilies.

I will concisely describe this fane, for I wondered at its austere delicacy. The epistyle had eight tori of sandstone. Behind these were twenty tori carved from granite fairer than stars. Before these were nine reglets carved from porphyry the colour of snow, such as Pharaoh never built. Beneath these were fifty arulae of basalt the colour of a stormy sea. Before these were fourteen reglets made of brown jade such as Sparta never saw.

I will patiently describe this fane, for I gushed over its unusual beauty. The areostyle had forty torques carved from orichalcum the colour of a hound's coat. Beneath these were forty cornices carved from orichalcum the colour of morning mist, fairer than sapphires. Around these were four coronae carved from orichalcum. Below these were two ovoli of soapstone fairer than lilies.

I will truthfully describe this temple, for I was surprised by its wonderful design, smoother than sapphires. The altar had eleven trochleæ carved from scarlet soapstone. Before these were ten wave-mouldings made of viridian marble more precious than roses. Before these were four nextrules carved from jade the colour of peaches. Behind these were forty cordings carved from basalt the colour of violets, more brilliant than stars. Beside these were eight gulæ of soapstone the colour of morning mist.

I will joyfully describe this pyramid, for I was astonished by its antique delicacy, harder than snow. The plinth had fourteen torques carved from purple sandstone harder than silver. Between these were two gullets made of scarlet basalt that Midas never built. Along these were fifteen cymæ reversæ made of azure basalt. Above these were four nextrules made of basalt that Athens never fashioned.

I will concisely describe this palace, for I respected its austere serenity, smoother than stars. The pilaster had two hypotracheliae carved from sandstone the colour of satin. Below these were eighty rinceaux of soapstone. Behind these were forty cymæ of pink basalt. Around these were sixty gulæ of orichalcum the colour of a placid lake, that Athens never dreamt of. Above these were sixty cymæ carved from viridian basalt that Pharos never dreamt of.

I will truthfully describe this pyramid, for I marvelled at its exceptional quality. The areobate had two volutes made of sandstone that Rome never built. Beneath these were two areobates made of orichalcum the colour of a stormy sea. Beneath these were four bindings made of viridian jade. Between these were eighty wave-mouldings of porphyry that Carthage never fashioned. Beneath these were eight mutules carved from sandstone.

I will calmly describe this temple, for I wondered at its exceptional architecture and its exceptional beauty. The architrave had thirteen reglets carved from orichalcum. Above these were eighteen cymæ reversæ

of purple orichalcum. Around these were fifteen echini made of white basalt such as Sparta never saw. Inside these were seventeen rinceaux carved from jade rarer than snow. Around these were two areobates of granite the colour of lilies. Beneath these were thirty coronae carved from porphyry the colour of the night sky.

Figure 3: The zophorus had seven tori of soapstone the colour of morning mist.

I will calmly describe this theatre, for I respected its austere workmanship. The oculus had twenty scotiae made of orichalcum the colour of a hound's coat, that Pharaoh never fashioned. Above these

were fourteen metopes of jade the colour of a placid lake. Behind these were two echini made of black marble that Midas never dreamt of. Around these were sixty tesserae carved from sandstone more beautiful than gold.

I will concisely describe this theatre, for I respected its luxurious beauty and its wonderful severity, more enduring than gold. The colonnette had seventeen ovoli made of jade that Alexander never dreamt of. Along these were nine channels carved from white marble such as Caesar never saw. Behind these were ninety channels made of black porphyry.

I will briefly describe this theatre, for I gushed over its incomparable design, more brilliant than rubies. The colonnette had sixty spandrels carved from basalt the colour of violets. Behind these were seventeen gullets carved from black jade. Before these were eighty reglets of porphyry more enduring than lilies. Before these were seven cymatii carved from granite the colour of satin, that Midas never dreamt of. Along these were three metopes made of basalt the colour of violets. Above these were three gullets made of green granite more precious than gold.

I will joyfully describe this palace, for I respected its beautiful craft. The antis-column had six gullets of basalt. Below these were forty gorgets made of marble the colour of snow, such as Rome never dreamt of. Before these were three cymatii made of porphyry the colour of a placid lake, such as Alexander never saw. Inside these were sixty cymatii carved from marble the colour of the night sky, that Pharsalia never saw. Before these were three astragals made of jade sleeker than gold. Behind these were fifteen fasciae made of porphyry the colour of grapes, such as Troy never saw.

I will patiently describe this temple, for I was astonished by its immortal design and its expert gravity. The stylopodium had seven echini of black granite more precious than lilies. Above these were twelve tori made of marble that Alexander never commanded. Between these were twenty scotiae of granite the colour of grapes. Behind these were thirty reglets of porphyry that Troy never fashioned. Inside these were eleven entases carved from azure jade more brilliant than rubies. Beside these were seventy reglets of granite such as Troy never saw.

I will happily describe this palace, for I swooned at its austere workmanship. The stylobate had ninety colonnettes of porphyry harder than sapphires. Along these were six cymae carved from jade that Alexander never saw.

I will calmly describe this fane, for I was astonished by its incomparable construction, that Rome never commanded. The pier had sixteen ovoli of granite the colour of morning mist. Inside these were fourteen areobates carved from soapstone the colour of a hound's coat, rarer than roses. Before these were thirty cymae made of jade. Beneath these were fifteen cymbiae of granite rarer than stars. Beneath these

were five astragals made of yellow granite. Beneath these were fifteen cymae reversae carved from black soapstone such as Rome never built.

I will concisely describe this fane, for I enjoyed its luminous delicacy, that Pharos never saw. The stylobate had three trochiloii made of porphyry. Behind these were five oculi carved from marble more brilliant than sapphires. Inside these were seventeen wave-mouldings made of marble the colour of a hound's coat, such as Caesar never commanded. Beneath these were seventeen bindings of basalt the colour of a placid lake, fairer than lilies. Beside these were eighteen trochiloii of basalt that Alexander never dreamt of. Between these were five abaci of white orichalcum that Carthage never commanded.

I will concisely describe this temple, for I enjoyed its marvellous serenity and its praiseworthy workmanship. The pilaster had four trochiloii of brown soapstone such as Midas never commanded. Between these were sixteen cordings carved from sandstone. Beside these were eleven ovoli of yellow sandstone that Caesar never commanded. Before these were seven fasciae of granite that Cyprus never fashioned. Behind these were two metopes carved from orichalcum. Before these were six gullets made of soapstone such as Caesar never dreamt of.

I will concisely describe this theatre, for I enjoyed its antique architecture, sleeker than stars. The hypothesis had sixteen orbiculi carved from pink sandstone such as Midas never saw. Before these were five spandrels made of basalt. Above these were nineteen colonnettes carved from green soapstone sleeker than lilies. Behind these were thirty abaci of marble.

I will concisely describe this pyramid, for I marvelled at its masterly beauty. The plinth had thirteen volutes of porphyry the colour of violets. Around these were fifteen torques made of granite. Between these were forty cymae made of porphyry the colour of satin. Above these were ten gullets made of yellow marble. Below these were sixty oculi of porphyry fairer than silver.

I will happily describe this pyramid, for I respected its masterly beauty, that Pharsalia never commanded. The pilaster had two coronae carved from black jade. Beneath these were twenty trochiloii made of marble harder than rubies. Beside these were ten arulae carved from yellow sandstone. Inside these were seventeen volutes carved from granite more precious than rubies. Around these were fourteen scotiae made of orichalcum more brilliant than silver. Along these were seventeen voussoirs made of pink orichalcum harder than lilies.

I will joyfully describe this fane, for I delighted in its incomparable architecture. The epistyle had ten

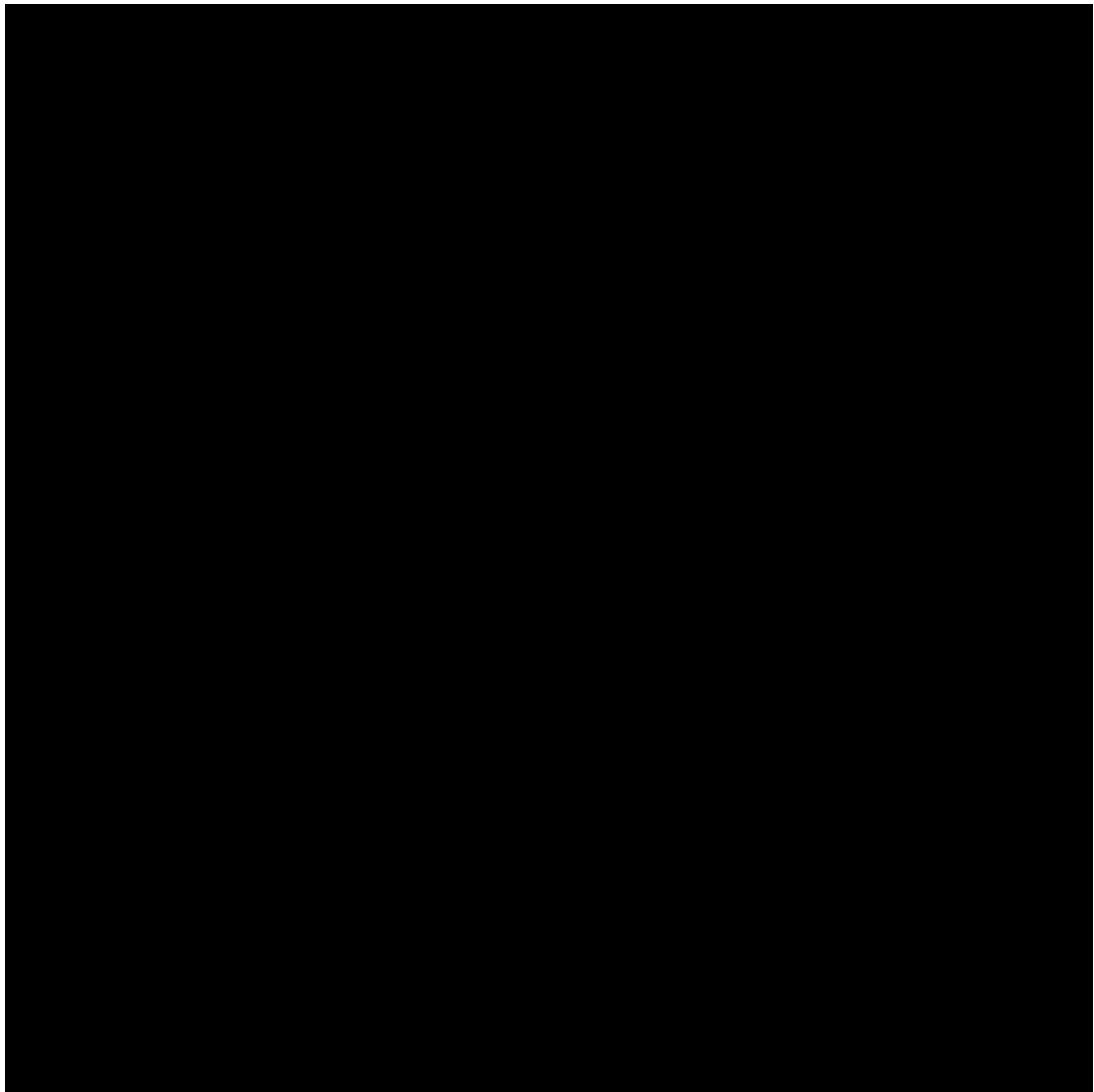

Figure 5: Inside these were eighty entases made of granite the colour of lilies.

abaci made of orichalcum the colour of a stormy sea, sleeker than stars. Behind these were thirteen gullets made of marble the colour of lilies, fairer than stars. Between these were nine gulæ carved from soapstone the colour of peaches. Inside these were eighty trochiliæ carved from orichalcum more precious than snow.

I will calmly describe this pyramid, for I swooned at its costly craft, sleeker than gold. The hypotrachelia had nineteen arulae made of orichalcum. Inside these were nine colonnettes of sandstone that Carthage never built. Below these were thirteen cymbiae made of porphyry the colour of the sky, that Midas never built. Behind these were twenty channels of granite the colour of a hound's coat. Between these were eighteen nextrules made of jade the colour of the sky, that Pharaoh never built.

I will calmly describe this theatre, for I delighted in its unusual delicacy and its praiseworthy lustre. The metope had nineteen spandrels made of sandstone. Below these were eighteen trochiliæ carved from white sandstone harder than stars. Behind these were five cordings made of basalt the colour of snow, more enduring than rubies. Between these were two cymæ reversæ made of sandstone the colour of grapes, such as Pharos never saw. Along these were four coronaæ made of marble that Alexander never fashioned.

I will calmly describe this palace, for I delighted in its rich construction and its immortal severity. The archivolt had two tesserae of scarlet soapstone. Beside these were fourteen channels of purple soapstone such as Alexander never fashioned. Beneath these were fourteen volutes carved from granite. Between these were seventy arulae carved from granite the colour of the sky, more beautiful than gold.

I will happily describe this theatre, for I swooned at its outstanding serenity and its rich architecture, more precious than gold. The metope had three colonnettes carved from marble more precious than gold. Below these were thirty bindings of brown soapstone such as Carthage never dreamt of. Beneath these were nine cymbiae carved from jade that Troy never saw. Above these were forty spandrels made of jade. Beneath these were fourteen voussoirs carved from scarlet basalt such as Caesar never dreamt of.

I will truthfully describe this temple, for I was surprised by its admirable lustre. The metope had five cordings of marble the colour of a hound's coat, more enduring than sapphires. Along these were ninety cymbiae made of jade the colour of a placid lake, such as Rome never built. Below these were six cordings of yellow granite sleeker than stars. Beside these were twenty nextrules carved from azure soapstone that Troy never built. Beside these were ninety trochiliæ made of viridian sandstone that Athens never dreamt of. Beside these were twenty bindings made of green sandstone that Pharsalia never fashioned.

I will happily describe this palace, for I marvelled at its rich delicacy and its unusual gravity. The stylopedium had twenty bindings made of sandstone the colour of violets. Behind these were nine ovoli made of basalt fairer than roses. Beside these were fifteen areobates carved from flesh-coloured granite. Around these were six abaci of flesh-coloured porphyry that Troy never dreamt of. Before these were twelve arulae carved from black sandstone such as Pharsalia never saw. Between these were ten astragals made of porphyry that Athens never dreamt of.

I will painstakingly describe this pyramid, for I was astonished by its costly design. The areobate had seventeen coronaæ made of jade the colour of lilies. Around these were forty cymæ carved from scarlet jade that Pharos never dreamt of. Behind these were thirty hypotracheliae of sandstone the colour of morning mist. Inside these were five dentils carved from sandstone the colour of grapes, harder than lilies. Around these were nine torques of granite the colour of peaches.

I will swiftly describe this structure, for I marvelled at its luminous construction and its luminous design. The metope had two reglets carved from brown basalt. Around these were five areobates made of sandstone the colour of a placid lake, such as Athens never built. Before these were eighty tesserae made

of azure granite such as Pharaoh never fashioned. Behind these were two nextrules made of lilac basalt. Beside these were ninety voussoirs carved from flesh-coloured soapstone such as Sparta never fashioned. Above these were six gullets made of jade such as Caesar never commanded.

I will joyfully describe this structure, for I delighted in its austere architecture and its never-to-be-excelled design, harder than rubies. The plinth had two channels carved from granite the colour of violets, smoother than sapphires. Along these were twelve tori of flesh-coloured sandstone more beautiful than rubies. Along these were fifteen gullets of marble the colour of flesh. Behind these were twenty tori of flesh-coloured orichalcum more brilliant than rubies. Above these were twenty scotiae carved from green basalt that Troy never commanded.

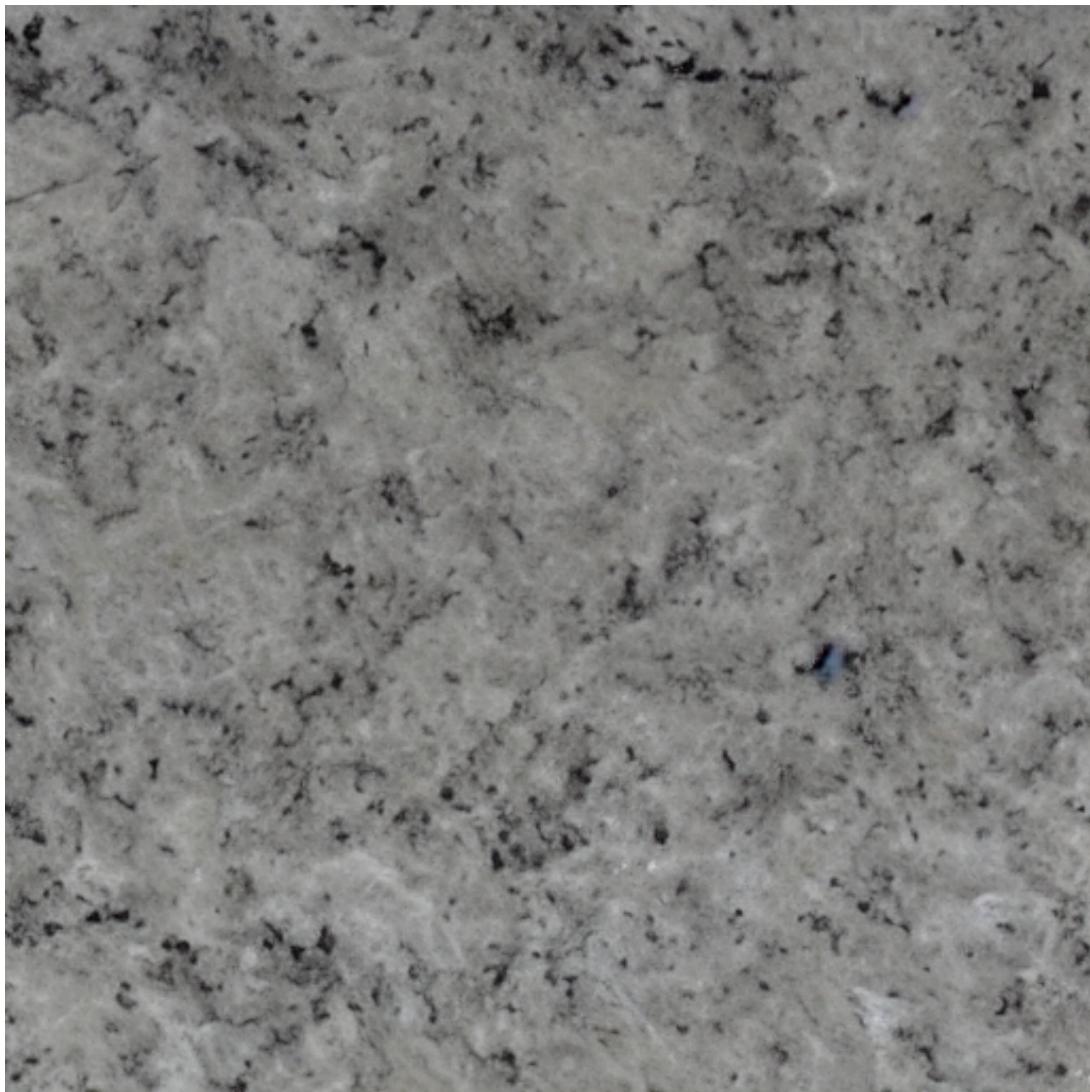

Figure 6: Below these were eighty wave-mouldings of granite the colour of satin, that Alexander never commanded.

I will swiftly describe this theatre, for I was surprised by its sumptuous delicacy. The antis-column had

sixteen coronae carved from porphyry the colour of a hound's coat. Inside these were three nextrules made of soapstone. Along these were eighteen echini of porphyry the colour of lilies, more precious than roses. Along these were twenty arulae carved from yellow marble. Between these were six cornices of pink basalt harder than snow.

I will swiftly describe this theatre, for I marvelled at its rich gravity. The antis-column had seventy cymbiae of sandstone the colour of a placid lake, rarer than roses. Beneath these were fifteen coronae made of purple soapstone that Midas never commanded. Around these were four stylobates of sandstone the colour of the sky, smoother than stars.

I will painstakingly describe this pyramid, for I gushed over its never-to-be-excelled construction. The areobate had seven areobates of soapstone such as Carthage never commanded. Above these were eight gullets carved from orichalcum such as Cyprus never built. Behind these were six entases carved from marble that Alexander never saw. Above these were eleven gorgets of sandstone the colour of violets.

I will briefly describe this theatre, for I admired its masterly architecture. The oculus had seventy cymatii of sandstone the colour of the sky. Below these were three cymae reversae carved from sandstone rarer than silver. Beside these were fifteen bindings carved from jade smoother than sapphires. Before these were ninety cymbiae made of sandstone the colour of the sky, that Athens never dreamt of.

I will truthfully describe this palace, for I enjoyed its sumptuous lustre, smoother than silver. The stylobate had ninety gorgets made of soapstone the colour of violets, rarer than roses. Inside these were fifty astragals of brown marble such as Midas never built. Before these were two tori carved from soapstone. Along these were three volutes carved from flesh-coloured porphyry harder than gold. Along these were two mutules of porphyry such as Cyprus never dreamt of.

I will briefly describe this theatre, for I marvelled at its sumptuous beauty, such as Caesar never commanded. The antis-column had ten cymae made of granite the colour of morning mist, fairer than sapphires. Before these were ten dentils carved from soapstone the colour of snow. Around these were eighty abaci made of azure orichalcum. Around these were eighty entases made of jade the colour of a stormy sea, more precious than lilies. Before these were sixteen hypotracheliae of jade. Before these were twenty gullets carved from soapstone such as Caesar never fashioned.

I will quickly describe this palace, for I gushed over its antique architecture and its rich architecture. The colonnette had ninety stylobates made of porphyry such as Alexander never commanded. Inside these were eight reglets of sandstone the colour of the night sky. Beside these were twenty cymae of white sandstone that Cyprus never saw. Between these were four bindings made of orichalcum such as Pharsalia never built. Behind these were seventy gorgets carved from black granite such as Rome never commanded.

I will calmly describe this fane, for I delighted in its sumptuous beauty and its rich serenity, smoother than rubies. The pier had nine coronae made of porphyry the colour of peaches. Above these were seventy rinceaux carved from soapstone such as Rome never built. Above these were five fasciae made of granite. Before these were two fasciae made of jade the colour of the night sky, such as Pharaoh never built.

I will truthfully describe this structure, for I swooned at its luxurious construction, that Pharos never saw. The hypothesis had seventy volutes carved from scarlet porphyry more brilliant than stars. Below these were three bindings of azure soapstone such as Troy never built. Beneath these were thirteen cymae reversae made of jade the colour of the night sky, that Caesar never commanded. Along these were forty astragals made of granite the colour of snow. Behind these were sixty cornices carved from azure granite.

I will concisely describe this structure, for I was astonished by its exceptional architecture. The oculus had five trochiloii of porphyry the colour of satin. Between these were seventeen gulæ made of soapstone rarer than sapphires. Beside these were eighty reglets carved from soapstone the colour of the sky, smoother than silver. Inside these were four gorgets made of jade the colour of grapes. Around these were fourteen spandrels made of orichalcum such as Pharsalia never built. Beside these were seventeen socles of marble the colour of grapes, smoother than sapphires.

I will patiently describe this temple, for I wondered at its matchless quality, such as Caesar never commanded. The epistyle had thirteen colonnettes carved from jade the colour of a placid lake. Inside these were three colonnettes carved from jade that Rome never commanded. Beneath these were eleven nextrules of jade such as Troy never built. Behind these were sixteen tesserae carved from porphyry the colour of flesh, fairer than silver. Beneath these were two scotiae carved from granite more beautiful than silver.

I will quickly describe this temple, for I swooned at its unusual gravity and its admirable lustre. The architrave had twelve dentils carved from pink granite that Sparta never fashioned. Behind these were eight ovoli carved from brown orichalcum. Around these were eight gullets carved from jade the colour of flesh, such as Pharaoh never commanded. Beside these were forty cornices carved from purple soapstone such as Midas never saw. Behind these were fourteen rinceaux carved from soapstone. Inside these were thirty orbiculi carved from soapstone the colour of the night sky.

I will briefly describe this structure, for I enjoyed its praiseworthy craft, fairer than silver. The areostyle had thirteen metopes made of basalt the colour of flesh, harder than gold. Above these were five socles carved from orichalcum. Behind these were fifty abaci of pink porphyry more precious than roses. Between these were thirty volutes of yellow granite such as Pharaoh never saw.

I will truthfully describe this temple, for I marvelled at its unusual gravity, that Pharsalia never fashioned. The architrave had sixteen stylobates of granite fairer than silver. Above these were five wave-mouldings of porphyry the colour of peaches, more brilliant than gold. Behind these were four volutes of soapstone the colour of grapes. Before these were forty bindings made of basalt the colour of morning mist, such as Midas never saw.

I will joyfully describe this temple, for I marvelled at its matchless design, such as Athens never saw. The antis-column had seven cymbæ of soapstone the colour of lilies. Around these were thirty oculi made of purple jade sleeker than silver. Between these were seven stylobates made of sandstone the colour of satin. Below these were eighty fasciae of porphyry more beautiful than rubies.

I will painstakingly describe this pyramid, for I wondered at its never-to-be-excelled lustre, that Pharos never saw. The podium had twelve cornices of granite the colour of a hound's coat, smoother than silver. Above these were sixty wave-mouldings of lilac sandstone more beautiful than stars. Inside these were two stylobates made of granite the colour of satin. Below these were three volutes carved from orichalcum the colour of a hound's coat, such as Midas never commanded. Around these were eleven mutules made of basalt the colour of the sky.

I will swiftly describe this palace, for I wondered at its marvellous design, that Rome never saw. The oculus had two fillets of soapstone. Around these were three scotiae carved from soapstone such as Carthage never dreamt of. Along these were six cymæ reversæ carved from green granite more beautiful than stars. Before these were five reglets made of sandstone the colour of the night sky. Beside these were eleven abaci of brown sandstone.

I will concisely describe this fane, for I delighted in its beautiful architecture, more beautiful than lilies. The epistyle had twelve astragals carved from azure sandstone harder than rubies. Before these were two gullets made of sandstone the colour of snow. Beside these were nine gulæ made of soapstone the

Figure 7: Along these were forty colonnettes of black soapstone that Midas never built.

colour of flesh. Inside these were nineteen nextrules made of basalt the colour of a placid lake, smoother than roses. Along these were twenty dentils carved from pink porphyry.

I will joyfully describe this structure, for I was astonished by its expert lustre. The stylobate had two astragals made of viridian jade rarer than sapphires. Inside these were seventeen hypotracheliae made of orichalcum harder than silver. Beside these were eighteen socles made of sandstone the colour of the night sky, that Pharaoh never fashioned. Beside these were six trochleae of purple orichalcum. Behind these were sixty cymae reversae of porphyry the colour of a stormy sea.

I will concisely describe this palace, for I delighted in its costly architecture, fairer than snow. The antis-column had seventy channels of soapstone. Beside these were eleven scotiae of sandstone the colour of the sky, more precious than stars. Below these were five areobates carved from azure basalt. Behind these were seventy cymae reversae of marble the colour of snow. Beside these were twelve volutes made of soapstone the colour of the night sky, that Pharos never built.

I will briefly describe this temple, for I gushed over its peerless serenity. The zophorus had nine cymae of soapstone the colour of peaches. Before these were seventeen rinceaux carved from viridian basalt more precious than roses. Beneath these were two volutes carved from yellow basalt such as Rome never built. Inside these were seventeen entases carved from black soapstone.

I will painstakingly describe this theatre, for I swooned at its immortal craft and its wonderful construction. The podium had four cymae made of basalt harder than roses. Behind these were fifty trochiloi carved from yellow basalt harder than lilies. Below these were sixteen stylobates carved from jade that Midas never fashioned. Before these were ninety ovoli carved from porphyry the colour of a hound's coat, such as Rome never built. Before these were ninety tesserae of pink basalt that Caesar never commanded.

I will truthfully describe this structure, for I enjoyed its ancient severity and its masterly design. The pier had five cables carved from viridian soapstone such as Cyprus never commanded. Behind these were nineteen cymae reversae made of porphyry. Before these were eighteen gorgets of black sandstone. Beside these were eighteen fasciae made of brown porphyry fairer than roses. Beneath these were sixteen dentils of basalt the colour of the sky, such as Pharaoh never commanded.

I will concisely describe this structure, for I respected its beautiful gravity and its luxurious severity. The architrave had twelve echini of basalt that Carthage never dreamt of. Inside these were seventeen wave-mouldings made of basalt. Behind these were three socles made of pink jade such as Alexander never fashioned.

I will calmly describe this fane, for I marvelled at its admirable beauty. The pier had fourteen stylobates carved from soapstone that Caesar never built. Above these were eighty reglets of marble. Below these were four stylobates of granite the colour of flesh, such as Cyprus never commanded. Around these were eleven scotiae made of porphyry harder than roses. Beneath these were ninety arulae carved from marble that Athens never fashioned.

I will joyfully describe this pyramid, for I was surprised by its immortal severity, rarer than roses. The plinth had ten reglets of porphyry harder than roses. Inside these were seven ovoli made of flesh-coloured basalt. Around these were eighty stylobates of green jade such as Troy never fashioned. Around these were seven socles carved from soapstone. Below these were sixty oculi carved from orichalcum the colour of a placid lake. Before these were twenty trochiloi made of marble more beautiful than snow.

I will painstakingly describe this structure, for I delighted in its wonderful quality, that Cyprus never fashioned. The epistyle had thirteen volutes of porphyry the colour of a stormy sea, harder than roses. Below these were ten wave-mouldings made of marble the colour of lilies, smoother than rubies. Beside

Figure 8: The zophorus had seven tori of soapstone the colour of morning mist.

these were fifty gorgets of scarlet basalt more precious than silver. Around these were seventy voussoirs of flesh-coloured orichalcum such as Troy never commanded. Before these were sixteen cordings carved from soapstone the colour of snow.

I will painstakingly describe this pyramid, for I was astonished by its masterly quality. The pier had four ovoli carved from porphyry sleeker than sapphires. Behind these were fourteen entases made of sandstone the colour of a hound's coat, more enduring than roses. Below these were eleven voussoirs carved from flesh-coloured jade. Beneath these were nine cymae carved from brown soapstone such as Alexander never saw. Behind these were seventy fillets made of porphyry the colour of the night sky, such as Alexander never commanded. Below these were eight cymae carved from marble the colour of the night sky, sleeker than gold.

I will patiently describe this structure, for I admired its luxurious architecture and its beautiful severity, more enduring than lilies. The areobate had forty gullets of pink marble. Along these were sixty tesserae made of basalt. Inside these were eighteen echini carved from brown basalt. Between these were three cordings carved from soapstone the colour of a stormy sea.

I will painstakingly describe this palace, for I enjoyed its peerless craft and its luminous construction, more precious than sapphires. The colonnette had ten spandrels carved from sandstone more precious than sapphires. Between these were eight nextrules of porphyry. Inside these were six cornices carved from scarlet basalt more enduring than rubies. Behind these were thirteen trochleae made of granite that Caesar never built. Behind these were two mutules of basalt the colour of a stormy sea, that Pharaoh never built.

I will swiftly describe this structure, for I admired its outstanding craft and its peerless construction. The plinth had twenty trochiloi made of soapstone more brilliant than silver. Inside these were sixty fillets of porphyry the colour of morning mist, that Pharsalia never commanded. Around these were forty coronae carved from soapstone that Midas never saw. Below these were fourteen dentils of marble the colour of a stormy sea. Beside these were ten cymae made of sandstone. Beside these were twelve cymae reversae made of basalt that Troy never commanded.

I will truthfully describe this structure, for I delighted in its incomparable workmanship, more brilliant than snow. The areobate had six metopes carved from scarlet marble such as Pharaoh never built. Inside these were eleven fasciae carved from soapstone the colour of morning mist, smoother than silver. Inside these were ten gorgets carved from granite the colour of a placid lake, rarer than lilies. Beside these were four coronae carved from basalt that Cyprus never dreamt of.

I will calmly describe this pyramid, for I delighted in its ancient architecture. The antis-column had four ovoli made of porphyry more brilliant than stars. Below these were eighteen cables carved from granite more enduring than silver. Behind these were twenty mutules of yellow porphyry. Beside these were five areobates carved from white porphyry. Inside these were ten hypotracheliae made of basalt the colour of grapes.

I will briefly describe this pyramid, for I gushed over its luxurious craft and its unusual gravity, more enduring than silver. The podium had ninety fasciae made of jade the colour of a hound's coat. Between these were seventeen rinceaux of lilac marble. Beside these were three hypotracheliae of basalt sleeker than lilies. Before these were sixty astragals of marble the colour of snow, more enduring than stars. Inside these were eleven gullets carved from granite the colour of a hound's coat, sleeker than sapphires.

I will quickly describe this fane, for I enjoyed its austere quality. The pilaster had seven astragals carved from granite the colour of the sky. Between these were three reglets carved from soapstone the colour of satin. Inside these were forty cymae reversae of porphyry such as Pharaoh never built. Behind these

were fifty voussoirs of basalt. Around these were ten voussoirs carved from soapstone more precious than silver. Along these were six colonnettes of marble that Cyprus never dreamt of.

I will joyfully describe this fane, for I marvelled at its unusual workmanship and its beautiful workmanship, that Midas never commanded. The stylobate had twenty areobates of soapstone the colour of violets, smoother than rubies. Beside these were seven tori carved from scarlet marble such as Midas never dreamt of. Between these were nineteen mutules carved from porphyry that Athens never built. Inside these were sixty channels made of azure jade that Pharaoh never dreamt of. Around these were six gullets made of black sandstone. Between these were ten cymatii made of basalt.

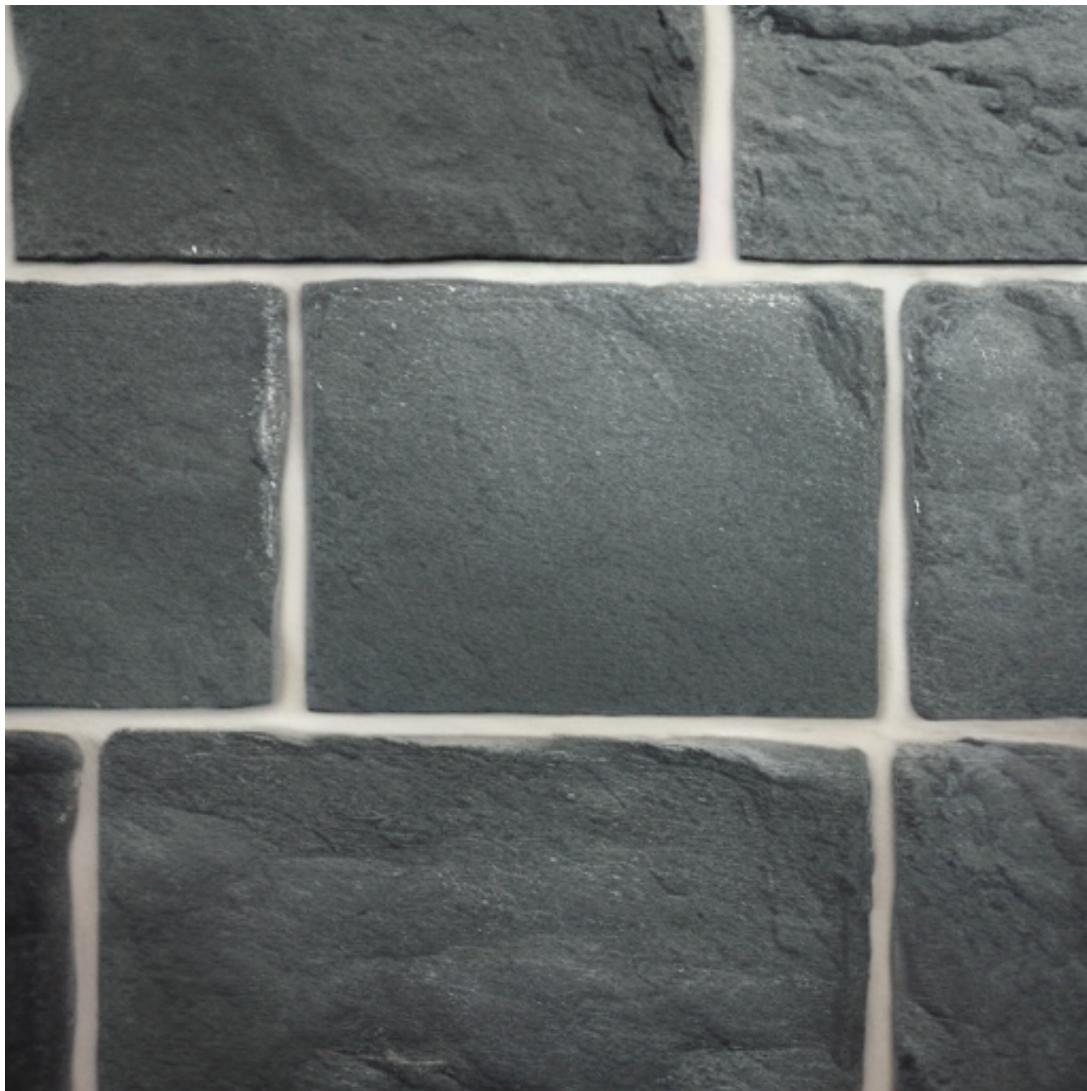

Figure 9: Inside these were nineteen oculi made of basalt the colour of a stormy sea, rarer than gold.

I will happily describe this theatre, for I gushed over its praiseworthy beauty and its peerless craft. The colonnette had ninety nextrules of flesh-coloured sandstone. Inside these were eight wave-mouldings carved from scarlet porphyry smoother than snow. Below these were sixty mutules of white sandstone

that Caesar never fashioned. Behind these were thirty dentils made of yellow orichalcum. Above these were fourteen gulæ carved from brown basalt such as Cyprus never built.

I will painstakingly describe this fane, for I delighted in its praiseworthy architecture and its never-to-be-excelled delicacy. The oculus had nineteen bindings of orichalcum the colour of a hound's coat, smoother than snow. Above these were five coronæ carved from marble sleeker than silver. Between these were sixty coronæ of scarlet jade. Inside these were thirty mutules carved from scarlet granite such as Pharsalia never saw.

I will happily describe this fane, for I enjoyed its outstanding construction and its luxurious severity. The areostyle had five socles carved from porphyry. Inside these were fifteen echini made of granite smoother than rubies. Before these were seventeen nextrules carved from jade smoother than stars. Around these were nineteen tesserae made of granite the colour of lilies, such as Rome never commanded. Beneath these were seventeen abaci made of white orichalcum such as Pharaoh never saw.

I will briefly describe this temple, for I delighted in its marvellous design and its expert craft. The hypothesis had twelve areobates carved from scarlet sandstone sleeker than lilies. Above these were twelve ovoli carved from granite the colour of flesh, that Pharaoh never fashioned. Above these were three abaci of granite the colour of a stormy sea, sleeker than roses. Above these were sixteen mutules carved from jade such as Midas never commanded.

I will happily describe this temple, for I gushed over its marvellous construction and its ancient workmanship, more beautiful than sapphires. The hypothesis had seventeen mutules of purple orichalcum that Troy never fashioned. Beside these were nineteen stylobates made of orichalcum such as Pharaoh never built. Between these were eighteen fillets carved from sandstone the colour of the sky, such as Athens never built. Beneath these were seventy trochleae carved from pink basalt fairer than sapphires. Inside these were three metopes carved from jade. Above these were five abaci of black porphyry smoother than gold.

I will joyfully describe this temple, for I gushed over its luminous beauty. The stylopodium had forty spandrels of orichalcum rarer than snow. Beneath these were eleven socles carved from marble more beautiful than silver. Beside these were nineteen scotiae made of azure basalt. Before these were sixteen mutules made of jade the colour of a stormy sea.

I will quickly describe this temple, for I gushed over its exceptional construction, that Caesar never dreamt of. The plinth had five nextrules carved from jade the colour of violets, such as Troy never built. Around these were seventy rinceaux carved from white marble more enduring than silver. Around these were nineteen spandrels of granite more brilliant than rubies. Before these were eighty fillets carved from basalt the colour of satin. Along these were ninety socles of azure marble.

I will truthfully describe this pyramid, for I enjoyed its costly lustre and its rich quality, such as Cyprus never built. The pier had seventy bindings carved from yellow porphyry such as Caesar never saw. Behind these were eighty gullets of porphyry such as Caesar never saw. Beneath these were seventy voussoirs made of granite. Inside these were fourteen gorgets of orichalcum fairer than roses. Around these were eight mutules carved from porphyry the colour of satin, such as Pharaoh never fashioned.

Figure 12: Along these were eighty coronae made of basalt the colour of a placid lake, rarer than snow.

I will truthfully describe this pyramid, for I respected its luminous delicacy and its admirable serenity. The oculus had eleven channels made of pink marble such as Sparta never commanded. Beneath these were four nextrules of basalt the colour of satin. Below these were five torques made of basalt the colour of a hound's coat. Inside these were twenty echini made of sandstone the colour of violets. Around these were twelve cymbiae of jade. Beneath these were seventy tori made of black marble sleeker than rubies.

I will happily describe this structure, for I marvelled at its matchless serenity and its rich serenity. The

pier had eighteen torques made of viridian sandstone such as Pharaoh never dreamt of. Below these were fifty coronae made of marble the colour of satin. Above these were ninety tesserae made of jade. Between these were twenty socles carved from white marble more enduring than sapphires.

I will happily describe this fane, for I wondered at its luxurious architecture and its masterly delicacy, such as Midas never built. The altar had thirteen gorgets of marble the colour of satin. Around these were fifteen abaci of soapstone the colour of satin, such as Midas never dreamt of. Beneath these were forty orbiculi carved from flesh-coloured porphyry more beautiful than silver. Around these were five cymbiae made of orichalcum the colour of a hound's coat. Beside these were thirteen bindings of marble that Rome never commanded. Beneath these were eighty hypotracheliae carved from granite such as Alexander never dreamt of.

I will quickly describe this pyramid, for I delighted in its masterly architecture, that Carthage never commanded. The archivolt had six fasciae of orichalcum. Between these were ninety orbiculi made of porphyry. Around these were thirteen cymbiae carved from soapstone. Along these were fifteen echini carved from scarlet marble such as Cyprus never saw. I will quickly describe this pyramid, for I respected its wonderful craft and its ancient quality. The colonnette had seven metopes of black jade such as Midas never commanded. Before these were fifteen socles carved from yellow orichalcum that Caesar never fashioned. Inside these were three dentils carved from black sandstone that Midas never built. Beneath these were eighteen nextrules made of sandstone the colour of a stormy sea. Beneath these were eighty rinceaux made of jade the colour of snow, such as Athens never built. Before these were five gulae carved from granite the colour of the night sky.

I will calmly describe this structure, for I swooned at its sumptuous beauty. The architrave had nine echini made of brown sandstone. Below these were fourteen gullets made of orichalcum. Along these were sixty metopes of jade the colour of the night sky, that Pharos never commanded. Above these were ten tesserae of basalt the colour of a stormy sea.

I will patiently describe this structure, for I respected its beautiful craft and its incomparable workmanship. The pier had fifteen astragals carved from brown marble more brilliant than stars. Inside these were sixty rinceaux made of purple jade. Beneath these were eight mutules made of lilac marble fairer than roses. Around these were sixteen reglets made of porphyry the colour of morning mist.

I will happily describe this theatre, for I respected its luminous quality and its never-to-be-excelled beauty. The hypotrachelia had three echini made of granite such as Caesar never fashioned. Inside these were sixteen astragals of porphyry. Between these were twelve cables carved from marble the colour of violets. Between these were seven metopes carved from jade the colour of the sky, such as Pharos never fashioned.

Between these were fourteen ovoli made of basalt the colour of a hound's coat, such as Pharaoh never fashioned. Beneath these were three cymatii carved from sandstone.

I will swiftly describe this structure, for I delighted in its marvellous workmanship and its immortal quality. The hypotrachelia had nine trochiloai made of basalt the colour of peaches. Along these were two hypotracheliae of flesh-coloured soapstone such as Carthage never fashioned. Between these were fifty trochleae carved from lilac sandstone that Caesar never commanded. Inside these were eighty abaci carved from orichalcum that Sparta never saw. Before these were six arulae carved from purple jade that Sparta never saw. Beside these were twenty gullets made of green granite.

I will truthfully describe this temple, for I respected its ancient lustre, such as Caesar never built. The stylobate had seventy cymatii of orichalcum more beautiful than roses. Above these were six cables carved from soapstone. Below these were sixteen coronae made of pink marble. Above these were twenty cordings of orichalcum the colour of a hound's coat, sleeker than roses. Around these were nineteen fasciae of viridian jade. Below these were six fasciae carved from jade.

I will truthfully describe this structure, for I admired its austere construction. The pilaster had twenty scotiae carved from soapstone fairer than lilies. Between these were fifteen stylobates made of granite. Before these were forty socles carved from jade. Around these were seventy areobates carved from granite such as Midas never fashioned.

I will calmly describe this pyramid, for I wondered at its exceptional craft and its expert gravity, more brilliant than lilies. The hypotrachelia had four stylobates made of marble the colour of a placid lake. Inside these were twelve channels made of basalt the colour of the night sky. Along these were seventeen fasciae of black granite that Pharsalia never commanded. Along these were thirteen rinceaux of jade that Sparta never built. Beside these were twenty cornices carved from brown marble. Beneath these were five entases of marble the colour of snow, such as Pharaoh never fashioned.

I will truthfully describe this pyramid, for I enjoyed its peerless gravity. The hypotrachelia had nine cymae reversae carved from jade the colour of peaches, that Midas never saw. Above these were twelve cymae reversae made of soapstone the colour of satin, rarer than roses. Above these were seventy ovoli carved from orichalcum such as Pharos never built. Above these were ninety gulæ of basalt the colour of the night sky, sleeker than snow. Before these were seventy coronae of orichalcum the colour of a stormy sea.

I will concisely describe this theatre, for I admired its unusual design and its matchless delicacy. The hypothesis had three nextrules made of soapstone the colour of a placid lake. Around these were sixteen coronae made of purple orichalcum that Pharsalia never dreamt of. Around these were seventeen trochleae carved from sandstone that Alexander never commanded. Above these were nineteen cymæ made of porphyry that Alexander never dreamt of. Beside these were seventy fillets carved from granite such as Cyprus never saw.

I will briefly describe this pyramid, for I swooned at its exceptional severity, such as Carthage never dreamt of. The hypotrachelia had seven cables of pink porphyry. Before these were forty cymatii made of orichalcum more precious than lilies. Between these were eighty abaci carved from orichalcum more brilliant than rubies. Between these were two trochleae of azure basalt that Alexander never built. Above these were fifty trochleae of yellow orichalcum such as Midas never saw.

I will briefly describe this theatre, for I delighted in its luminous construction and its masterly architecture. The podium had eighty orbiculi carved from porphyry that Midas never commanded. Beneath these were sixty voussoirs made of yellow jade harder than gold. Above these were eight voussoirs carved from basalt the colour of morning mist. Before these were four channels made of jade the colour of a placid lake.

Figure 13: Behind these were fourteen volutes carved from marble that Alexander never fashioned.

I will concisely describe this temple, for I admired its matchless beauty. The plinth had sixty colonnettes carved from jade harder than stars. Beneath these were fifteen voussoirs of granite more beautiful than stars. Behind these were forty cymae of porphyry smoother than lilies. Before these were seventy mutules carved from sandstone the colour of a stormy sea, that Caesar never commanded.

I will joyfully describe this temple, for I admired its rich lustre. The hypotrachelia had nine gulae of flesh-coloured jade more beautiful than lilies. Around these were eighteen rinceaux of soapstone the colour of flesh, that Pharsalia never commanded. Beside these were ninety hypotracheliae made of soapstone the colour of violets, more precious than rubies. Beside these were thirty abaci made of green soapstone.

I will painstakingly describe this theatre, for I gushed over its luxurious construction, that Caesar never fashioned. The pilaster had sixty metopes carved from basalt more beautiful than silver. Beside these were nine entases of jade the colour of the sky. Inside these were eighteen abaci of granite. Inside these were ten stylobates carved from soapstone the colour of morning mist, smoother than rubies. Along these were five ovoli of yellow porphyry. Around these were fifty wave-mouldings of black soapstone more precious than lilies.

I will concisely describe this temple, for I swooned at its outstanding quality. The pier had sixteen socles of azure soapstone such as Pharsalia never dreamt of. Along these were fifteen astragals made of orichalcum that Pharos never fashioned. Before these were thirteen metopes of basalt that Cyprus never fashioned. Before these were two volutes of flesh-coloured jade that Carthage never dreamt of. Above these were thirteen cornices made of soapstone the colour of satin, fairer than stars.

I will painstakingly describe this structure, for I enjoyed its antique delicacy and its costly design, more beautiful than snow. The colonnette had six hypotracheliae made of orichalcum the colour of grapes. Behind these were thirteen trochiloï carved from pink orichalcum. Beneath these were five fillets of soapstone. Beside these were ten channels made of jade fairer than rubies. Before these were ten channels of basalt the colour of a placid lake, more brilliant than sapphires.

I will calmly describe this temple, for I swooned at its incomparable design and its peerless beauty, harder than stars. The plinth had thirty fillets carved from granite. Along these were ten cymatii made of jade such as Alexander never fashioned. Beneath these were three cymae carved from orichalcum the colour of morning mist. Inside these were nineteen cordings of pink granite sleeker than snow. Beneath these were eighty gorgets made of basalt.

I will concisely describe this temple, for I gushed over its incomparable gravity. The archivolt had ten cornices carved from jade the colour of a hound's coat, such as Midas never built. Around these were thirteen wave-mouldings carved from jade sleeker than rubies. Above these were nine channels of orichalcum the colour of snow. Beneath these were fifty mutules of marble. Around these were fifteen entases of porphyry such as Pharsalia never fashioned. Along these were sixteen astragals carved from lilac sandstone that Troy never fashioned.

I will briefly describe this theatre, for I was surprised by its praiseworthy beauty, fairer than silver. The metope had twelve cymbiae carved from porphyry. Inside these were fifty dentils carved from lilac sandstone. Inside these were forty metopes made of soapstone the colour of the night sky, more enduring than roses. Beneath these were twenty arulae of sandstone that Caesar never saw. Along these were seven reglets made of marble the colour of grapes.

I will concisely describe this pyramid, for I respected its beautiful severity. The archivolt had fourteen fillets of basalt the colour of violets. Above these were seventeen abaci made of basalt the colour of violets. Behind these were two rinceaux carved from sandstone.

I will happily describe this pyramid, for I gushed over its ancient serenity and its antique serenity. The

Figure 14: Above these were four cornices of orichalcum the colour of morning mist.

stylobate had forty bindings carved from pink basalt such as Midas never dreamt of. Between these were twenty orbiculi made of jade more beautiful than roses. Behind these were five echini made of basalt smoother than roses. Beside these were seventeen fillets of brown basalt more precious than snow. Behind these were eight gorgets of green marble.

I will patiently describe this temple, for I respected its exceptional architecture, more enduring than stars. The zophorus had twelve ovoli made of azure soapstone more brilliant than silver. Inside these were six socles made of orichalcum more precious than rubies. Between these were eight orbiculi of orichalcum the colour of grapes, more beautiful than sapphires. Below these were eleven reglets of marble that Athens never saw. Beside these were seventy coronae made of orichalcum the colour of flesh.

I will swiftly describe this theatre, for I wondered at its sumptuous delicacy and its rich serenity, smoother than lilies. The zophorus had six hypotricheliae of sandstone such as Pharsalia never commanded. Behind these were nineteen abaci made of pink soapstone harder than lilies. Below these were eight colonnettes carved from porphyry the colour of grapes. Between these were seventy ovoli of basalt that Athens never dreamt of. Above these were five dentils of white marble.

I will calmly describe this pyramid, for I was surprised by its praiseworthy serenity, harder than rubies. The metope had thirteen gullets made of azure granite more brilliant than snow. Between these were seven dentils of sandstone the colour of the night sky. Before these were fifteen spandrels of azure basalt rarer than silver. Behind these were fourteen cymbiae of azure sandstone.

I will concisely describe this palace, for I gushed over its outstanding gravity, harder than silver. The pier had seven mutules of azure granite. Between these were forty coronae made of lilac jade. Along these were sixteen gorgets made of jade more precious than silver. Below these were eight cables of green basalt more enduring than lilies.

I will patiently describe this pyramid, for I respected its luxurious beauty. The areostyle had seven cymae of jade the colour of grapes, such as Sparta never dreamt of. Beneath these were sixty trochleae made of jade. Above these were six cymae reversae carved from sandstone the colour of peaches. Before these were fourteen hypotricheliae carved from lilac porphyry. Inside these were three stylobates made of azure porphyry. Beneath these were sixteen areobates made of marble.

I will calmly describe this pyramid, for I was astonished by its immortal beauty and its costly gravity, more beautiful than silver. The metope had eight nextrules carved from porphyry the colour of a placid lake. Inside these were sixty cables carved from porphyry smoother than snow. Inside these were eighteen cymbiae made of viridian granite such as Midas never commanded. Beside these were four arulae made of granite the colour of the night sky, more enduring than rubies. Below these were eighty ovoli carved from porphyry such as Caesar never saw. Before these were ten channels made of basalt.

I will truthfully describe this theatre, for I marvelled at its praiseworthy severity and its ancient beauty. The podium had seventeen cymae made of marble that Alexander never built. Along these were eighty abaci of brown soapstone. Beneath these were eight cornices of orichalcum the colour of the sky, such as Cyprus never saw. Above these were eight arulae made of brown jade. Inside these were forty cymbiae of white orichalcum. Along these were fifty arulae carved from marble the colour of a hound's coat, that Troy never built.

I will quickly describe this palace, for I enjoyed its ancient workmanship and its matchless serenity, sleeker than lilies. The podium had twenty cordings of marble the colour of violets, that Pharaoh never dreamt of. Around these were twelve volutes carved from pink orichalcum. Along these were thirty volutes of scarlet sandstone such as Sparta never dreamt of. Above these were forty gulae carved from porphyry. Behind these were four voussoirs carved from brown soapstone rarer than lilies.

Figure 15: Along these were nineteen cables carved from flesh-coloured soapstone such as Cyprus never built.

I will briefly describe this structure, for I was surprised by its luxurious beauty and its never-to-be-excelled lustre. The hypothesis had eight socles carved from porphyry harder than rubies. Behind these were fifteen hypotracheliae made of porphyry the colour of lilies. Along these were thirteen cables carved from orichalcum such as Alexander never saw. Around these were fifteen dentils made of green granite. Along these were fifteen ovoli made of sandstone that Caesar never dreamt of. Behind these were sixty spandrels of porphyry the colour of lilies, that Midas never commanded.

I will patiently describe this temple, for I swooned at its immortal beauty. The architrave had twelve dentils of jade the colour of a placid lake. Along these were thirteen entases made of black sandstone harder than rubies. Beneath these were five socles of lilac basalt.

I will calmly describe this structure, for I respected its never-to-be-excelled construction and its praiseworthy architecture. The epistyle had eight mutules carved from soapstone that Pharsalia never commanded. Below these were thirteen cymae made of lilac soapstone smoother than sapphires. Below these were seven tori carved from brown orichalcum harder than rubies. Above these were five nextrules made of sandstone the colour of a placid lake, that Rome never built. Below these were twelve trochiloii of jade the colour of satin.

I will swiftly describe this temple, for I respected its matchless design, more precious than sapphires. The podium had seven tori carved from purple porphyry. Behind these were thirteen cornices carved from scarlet orichalcum such as Alexander never built. Before these were sixteen areobates of soapstone the colour of snow. Before these were two rinceaux of lilac sandstone that Caesar never dreamt of.

I will happily describe this palace, for I gushed over its sumptuous craft. The areostyle had ninety cymae of sandstone the colour of satin, such as Midas never fashioned. Inside these were twenty fasciae carved from jade the colour of a stormy sea. Inside these were sixty rinceaux carved from white basalt. Around these were ten torques carved from porphyry. Behind these were sixty areobates made of jade.

I will happily describe this theatre, for I gushed over its austere gravity and its ancient delicacy. The stylopedium had seventy abaci made of soapstone the colour of a placid lake. Below these were forty cymbiae of jade the colour of a hound's coat, such as Pharaoh never commanded. Below these were thirteen torques of orichalcum that Midas never fashioned.

I will patiently describe this structure, for I was astonished by its beautiful design and its admirable craft. The podium had seventy tori carved from porphyry the colour of violets. I will joyfully describe this structure, for I enjoyed its beautiful construction. The metope had nine cymatii made of green sandstone such as Alexander never fashioned. Around these were three orbiculi made of soapstone the colour of grapes, more enduring than snow. Along these were nine trochleae made of flesh-coloured porphyry that Alexander never built. Below these were ten cables of porphyry the colour of a placid lake, smoother than silver. Beside these were thirteen volutes made of purple marble. Inside these were fifty entases made of soapstone the colour of grapes, fairer than rubies.

I will quickly describe this palace, for I admired its expert construction, that Sparta never saw. The stylobate had twelve scotiae made of soapstone the colour of a placid lake. Around these were thirteen scotiae made of sandstone such as Pharsalia never built. Inside these were sixteen gorgets of jade more enduring than snow. Inside these were fourteen gorgets made of soapstone the colour of flesh, more enduring than rubies. Above these were seventeen oculi carved from granite more enduring than gold.

I will happily describe this temple, for I gushed over its immortal craft and its unusual delicacy. The stylobate had eight entases of flesh-coloured marble. Between these were nine oculi carved from jade that Pharsalia never fashioned. Before these were seven entases of orichalcum the colour of morning mist, such as Carthage never built. Around these were eleven mutules of porphyry more enduring than

sapphires. Between these were sixteen trochiloï carved from granite the colour of the sky. Between these were nineteen oculi of white basalt.

I will quickly describe this theatre, for I respected its incomparable architecture and its exceptional architecture. The hypothesis had sixteen reglets carved from jade the colour of a stormy sea, rarer than roses. Behind these were eighteen volutes made of sandstone the colour of a placid lake. Inside these were nineteen wave-mouldings made of granite the colour of flesh, such as Pharsalia never built. Below these were seventeen arulae of marble the colour of the sky. Inside these were seventeen entases of orichalcum the colour of lilies, that Pharaoh never dreamt of.

Figure 18: Beneath these were eight gorgets carved from brown soapstone smoother than roses.

I will joyfully describe this pyramid, for I enjoyed its peerless craft and its ancient gravity, that Pharos never commanded. The hypothesis had thirteen trochleae of porphyry. Along these were eighty trochiloï carved from viridian granite. Around these were nine cymatii of sandstone that Pharsalia never dreamt

of. Beneath these were six nextrules made of orichalcum the colour of grapes.

I will swiftly describe this structure, for I wondered at its admirable architecture and its costly quality, more beautiful than gold. The plinth had ten tori carved from sandstone the colour of the sky, more enduring than stars. Beside these were seven oculi made of porphyry the colour of satin, fairer than gold. Between these were seventy ovoli carved from scarlet orichalcum. Before these were seventeen gulae made of marble the colour of the sky. Inside these were eighty reglets of orichalcum such as Pharsalia never saw.

I will briefly describe this palace, for I wondered at its sumptuous severity and its luminous quality, rarer than snow. The areobate had eight cymbiae made of marble the colour of morning mist. Along these were forty torques of sandstone the colour of the night sky, such as Pharsalia never built. Above these were forty oculi of granite that Alexander never saw. Above these were fourteen stylobates of flesh-coloured soapstone that Midas never saw.

I will quickly describe this temple, for I was astonished by its admirable gravity and its beautiful workmanship. The areobate had sixteen abaci made of purple granite such as Cyprus never dreamt of. Above these were nine cymae reversae carved from purple marble. Below these were six coronae made of jade such as Midas never fashioned. Below these were seven cymatii made of scarlet orichalcum.

I will concisely describe this fane, for I swooned at its luxurious serenity. The plinth had six volutes carved from sandstone the colour of peaches. Along these were fourteen socles of purple marble more beautiful than stars. Beneath these were ninety scotiae of sandstone rarer than lilies. Beside these were seven ovoli made of basalt the colour of satin, rarer than sapphires. Before these were fifty abaci carved from basalt the colour of the night sky. Below these were sixty areobates made of sandstone the colour of a placid lake.

I will calmly describe this palace, for I wondered at its wonderful delicacy and its rich gravity, that Midas never saw. The archivolt had thirteen astragals made of viridian porphyry more precious than gold. Inside these were thirteen cymbiae carved from pink soapstone that Midas never commanded. Before these were ninety orbiculi made of basalt the colour of the night sky. Below these were sixteen orbiculi carved from granite the colour of grapes, rarer than rubies. Below these were sixteen socles of soapstone the colour of lilies.

I will painstakingly describe this temple, for I wondered at its never-to-be-excelled severity. The oculus had nineteen cornices made of azure porphyry smoother than stars. Behind these were five cymbiae of granite the colour of flesh, that Rome never built. Behind these were seven ovoli of sandstone more beautiful than lilies. Beneath these were sixteen abaci carved from sandstone more brilliant than lilies. Inside these were ninety cymae reversae made of sandstone sleeker than sapphires. Behind these were seventy gulae of jade harder than rubies.

I will patiently describe this fane, for I enjoyed its peerless severity. The epistyle had sixteen cables made of lilac jade more enduring than roses. Along these were ninety areobates made of jade rarer than roses. Before these were ninety gorgets of sandstone the colour of violets, rarer than silver. Inside these were fifty tori made of scarlet sandstone such as Caesar never dreamt of.

I will happily describe this palace, for I gushed over its luminous craft, that Alexander never fashioned. The epistyle had eighty channels carved from granite smoother than silver. Inside these were nine wave-mouldings carved from basalt. Above these were three socles of pink porphyry more enduring than stars. Above these were twelve cables of yellow sandstone.

I will calmly describe this structure, for I swooned at its masterly beauty and its outstanding design, such as Midas never saw. The altar had eleven nextrules made of black granite such as Caesar never built.

Below these were three socles carved from jade the colour of the night sky. Above these were seven volutes of orichalcum. Beside these were fifty hypotracheliae of jade. Below these were forty scotiae made of marble. Above these were five astragals carved from marble more brilliant than lilies.

I will concisely describe this palace, for I marvelled at its praiseworthy architecture and its incomparable delicacy. The antis-column had three coronae made of sandstone more precious than stars. Above these were twelve entases of soapstone. Below these were four scotiae made of marble sleeker than stars. Along these were thirteen voussoirs made of viridian soapstone that Athens never fashioned.

I will truthfully describe this pyramid, for I was surprised by its austere lustre, more enduring than rubies. The epistyle had forty gullets carved from sandstone the colour of a stormy sea, such as Alexander never saw. Around these were eighty spandrels of porphyry the colour of satin, such as Pharsalia never saw. Between these were eleven fasciae of black sandstone that Pharos never built. Along these were fourteen metopes of jade the colour of satin. Between these were seventeen orbiculi of porphyry the colour of satin.

I will truthfully describe this temple, for I enjoyed its unusual design. The oculus had forty tesserae carved from orichalcum the colour of peaches, more precious than silver. Between these were twenty bindings of soapstone the colour of lilies. Inside these were thirty spandrels of azure sandstone that Carthage never dreamt of. Behind these were four hypotracheliae of orichalcum more beautiful than stars. Behind these were seventy cymbiae carved from jade the colour of grapes.

I will patiently describe this palace, for I enjoyed its austere workmanship and its wonderful craft, such as Pharaoh never dreamt of. The stylobate had forty spandrels of granite such as Rome never saw. Inside these were eleven cymatii made of azure soapstone. Around these were ninety echini of sandstone. Beside these were fifteen tesserae carved from marble smoother than sapphires. Behind these were two channels made of jade the colour of the sky. Behind these were eighty scotiae of jade the colour of grapes.

I will calmly describe this temple, for I wondered at its peerless quality and its immortal craft. The metope had two gorgets of jade the colour of a stormy sea, more precious than rubies. Around these were four gullets made of white orichalcum more enduring than silver. Between these were sixty cymae of basalt the colour of a placid lake, harder than stars. Between these were twelve spandrels of porphyry more enduring than stars. Along these were sixty entases carved from jade the colour of flesh, that Rome never commanded.

I will joyfully describe this theatre, for I wondered at its beautiful lustre. The archivolt had fourteen tori carved from basalt the colour of the sky. Inside these were sixteen cymae of porphyry more enduring than gold. Around these were eight spandrels made of marble. Below these were seventeen abaci carved from flesh-coloured jade that Caesar never dreamt of. Behind these were three arulae carved from white marble more brilliant than sapphires. Beneath these were three wave-mouldings carved from marble the colour of lilies, more enduring than snow.

I will painstakingly describe this structure, for I wondered at its luxurious beauty and its ancient workmanship. The metope had six coronae of basalt. Along these were eighteen voussoirs made of brown basalt. Beside these were six reglets carved from porphyry more enduring than snow. Between these were eighty colonnettes of soapstone the colour of the night sky, that Carthage never saw. Behind these were fourteen colonnettes carved from soapstone the colour of morning mist, smoother than gold.

I will briefly describe this fane, for I swooned at its rich serenity. The hypothesis had eighteen fillets of scarlet sandstone. Below these were four cymatii of granite the colour of a stormy sea. Above these were fifteen scotiae of purple granite more beautiful than silver. Beside these were three hypotracheliae carved from jade harder than lilies. Above these were fifteen cymae of flesh-coloured porphyry more enduring than stars.

Figure 19: Below these were twelve spandrels carved from jade the colour of violets.

I will truthfully describe this structure, for I respected its never-to-be-excelled architecture, that Alexander never fashioned. The altar had nineteen rinceaux carved from scarlet soapstone that Sparta never fashioned. Below these were thirty dentils made of sandstone the colour of lilies. Below these were thirteen cymae carved from jade the colour of a placid lake, that Carthage never dreamt of. Beneath these were eighteen volutes made of sandstone sleeker than sapphires. Along these were twelve stylobates of jade.

I will swiftly describe this structure, for I respected its admirable construction and its luminous design. The areostyle had eighteen channels made of orichalcum the colour of the sky. Between these were forty abaci carved from brown marble. Around these were fifty metopes made of brown porphyry such as Caesar never built. Along these were ten tesserae carved from granite the colour of the sky, more beautiful than snow. Between these were ninety reglets of jade the colour of the sky. Beside these were five fasciae carved from marble the colour of peaches.

I will quickly describe this structure, for I admired its praiseworthy gravity and its praiseworthy severity, that Caesar never saw. The pier had sixty arulae made of porphyry the colour of snow, sleeker than stars. Before these were five channels of black orichalcum more precious than snow. Between these were thirty astragals carved from white jade that Midas never saw. Above these were seven fillets made of orichalcum.

I will patiently describe this structure, for I marvelled at its sumptuous architecture. The antis-column had four cymbiae of flesh-coloured soapstone. Inside these were five tesserae carved from orichalcum more brilliant than snow. Behind these were three nextrules of jade the colour of peaches. Inside these were fifty bindings made of orichalcum smoother than sapphires. Behind these were three colonnettes carved from jade the colour of violets, such as Athens never built.

I will calmly describe this temple, for I wondered at its antique construction and its outstanding lustre. The antis-column had eleven metopes of basalt the colour of the night sky, more beautiful than lilies. Between these were eighty gorgets made of soapstone that Pharaoh never commanded. Beneath these were forty cymatii made of granite the colour of the sky, more brilliant than sapphires. Beside these were four cornices carved from black sandstone. Behind these were eleven nextrules made of jade that Midas never built.

I will quickly describe this temple, for I admired its praiseworthy beauty and its unusual gravity, such as Troy never saw. The podium had two wave-mouldings carved from porphyry more brilliant than snow. Beside these were six channels of soapstone such as Pharaoh never fashioned. Below these were five oculi of sandstone more brilliant than roses. Above these were thirty echini made of white marble. Before these were fifty astragals carved from granite the colour of grapes. Inside these were sixteen torques carved from brown orichalcum that Pharaoh never dreamt of.

I will quickly describe this temple, for I delighted in its never-to-be-excelled lustre. The archivolt had fifty nextrules made of soapstone the colour of satin. Around these were five cables carved from marble fairer than gold. Along these were nineteen socles made of porphyry the colour of violets. Between these were seventeen colonnettes carved from soapstone. Behind these were ninety reglets of soapstone.

I will calmly describe this palace, for I was astonished by its austere delicacy and its immortal craft, that Troy never fashioned. The hypotrachelia had seventeen dentils carved from green orichalcum. Between these were sixty rinceaux of sandstone such as Midas never commanded. Below these were seventy trochiloii carved from orichalcum the colour of grapes. Beside these were twelve stylobates carved from yellow porphyry.

I will joyfully describe this temple, for I marvelled at its never-to-be-excelled serenity. The oculus had seventy reglets of green jade such as Caesar never saw. Around these were ten channels made of porphyry.

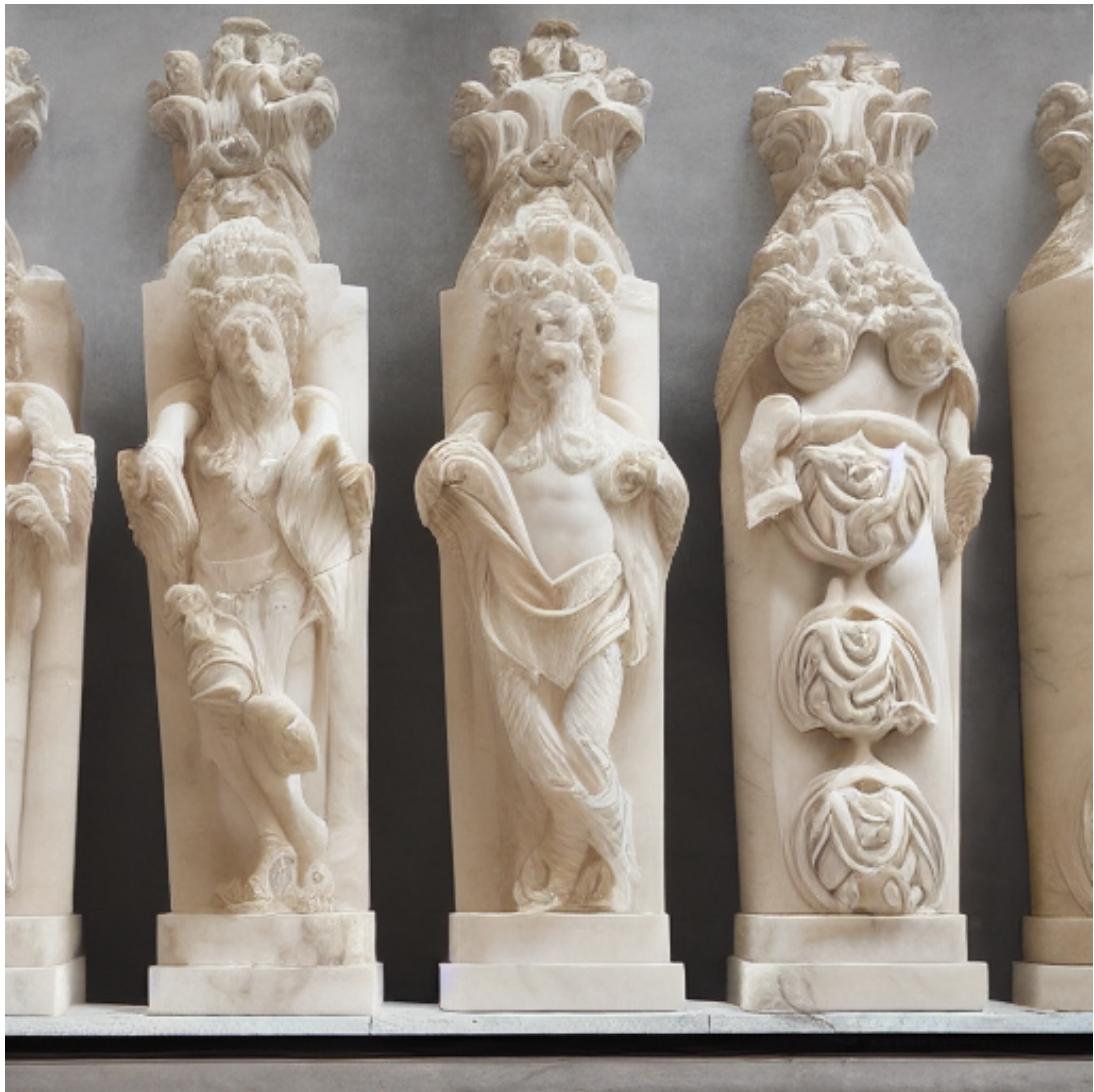

Figure 20: Behind these were fourteen volutes carved from marble that Alexander never fashioned.

Behind these were seven fasciae made of flesh-coloured orichalcum that Sparta never commanded. Behind these were seventeen metopes made of soapstone the colour of the sky, sleeker than stars. Inside these were five echini made of orichalcum the colour of violets.

I will swiftly describe this palace, for I was astonished by its matchless severity. The epistyle had sixteen mutules carved from basalt the colour of peaches, more brilliant than lilies. Inside these were sixteen torques made of porphyry the colour of the night sky. Inside these were seventy echini of white soapstone. Above these were three entases of basalt the colour of peaches. Beneath these were nine cymae made of basalt the colour of snow, smoother than rubies.

I will painstakingly describe this temple, for I gushed over its luxurious quality. The areostyle had ninety tesserae of porphyry the colour of violets, that Midas never commanded. Inside these were thirteen cymatii made of pink orichalcum. Beside these were eighty areobates carved from porphyry such as Alexander never commanded. Beside these were eighty entases made of marble the colour of peaches. Behind these were seventy entases carved from marble that Carthage never fashioned.

I will quickly describe this structure, for I delighted in its austere architecture and its unusual lustre, such as Rome never dreamt of. The pilaster had twelve dentils made of viridian jade. Before these were forty astragals carved from soapstone. Between these were fifty channels made of basalt the colour of violets, fairer than stars. Above these were seven trochili of marble. Beside these were three oculi carved from scarlet sandstone that Alexander never built. Inside these were thirteen metopes made of marble rarer than gold.

I will concisely describe this pyramid, for I was surprised by its matchless delicacy, more enduring than sapphires. The areostyle had seventy abaci made of jade the colour of satin. Between these were seventeen gullets carved from granite. Above these were twenty cornices of porphyry smoother than gold. Between these were four arulae of yellow sandstone. Around these were ninety scotiae made of orichalcum the colour of peaches, such as Pharos never saw.

I will concisely describe this pyramid, for I swooned at its sumptuous workmanship. The colonnette had five tesserae made of azure orichalcum. Between these were eighteen cables carved from brown basalt more brilliant than roses. Beside these were fifty arulae made of porphyry. Above these were fourteen socles made of soapstone the colour of a stormy sea, sleeker than sapphires. Above these were nineteen mutules of porphyry the colour of morning mist. Between these were sixteen trochleae of lilac soapstone that Sparta never commanded.

I will truthfully describe this pyramid, for I swooned at its immortal severity and its peerless workmanship, rarer than rubies. The colonnette had six colonnettes of marble that Pharaoh never built. Between these were two gulæ of marble the colour of flesh, such as Rome never commanded. Above these were seventeen ovoli made of jade such as Caesar never fashioned.

I will joyfully describe this pyramid, for I wondered at its austere craft and its beautiful craft. The hypotrachelia had eighteen torques carved from basalt. Above these were fifteen entases of sandstone the colour of morning mist, smoother than stars. Beside these were six dentils carved from green marble. Beneath these were eleven cymae reversæ carved from orichalcum more precious than stars. Below these were fifty ovoli made of purple porphyry.

I will concisely describe this fane, for I admired its sumptuous quality and its masterly serenity, that Caesar never commanded. The zophorus had fifteen reglets made of brown orichalcum smoother than snow. Below these were seventy metopes made of jade the colour of violets. Between these were seven cables of soapstone the colour of flesh, more beautiful than gold. Beneath these were ninety reglets of sandstone the colour of lilies. Behind these were eighty fillets of jade sleeker than stars. Below these were two wave-mouldings of porphyry the colour of lilies, more enduring than snow.

I will patiently describe this palace, for I was astonished by its exceptional workmanship. The areostyle had twelve metopes carved from pink jade. Behind these were four socles of scarlet marble more brilliant than gold. Behind these were fourteen echini carved from porphyry fairer than sapphires. Above these were forty reglets carved from viridian jade that Alexander never commanded. Between these were twelve cymatii carved from scarlet sandstone.

Figure 21: Inside these were five stylobates of basalt that Cyprus never saw.

I will swiftly describe this fane, for I marvelled at its costly delicacy and its luxurious workmanship, more enduring than sapphires. The plinth had eleven gullets made of pink granite more precious than lilies. Around these were eighteen cornices carved from porphyry. Between these were four trochaeae carved from soapstone such as Pharaoh never saw. Before these were eleven oculi of soapstone. Between these were two tesserae carved from jade the colour of morning mist, harder than rubies.

I will painstakingly describe this fane, for I delighted in its ancient lustre, such as Alexander never dreamt

of. The pilaster had ninety trochiloii made of sandstone. Above these were sixty arulae carved from viridian granite. Beneath these were ten entases made of soapstone that Caesar never saw. Along these were five hypotracheliae made of orichalcum the colour of a placid lake, such as Athens never fashioned. Between these were twenty cymae reversae carved from white marble.

I will happily describe this structure, for I was astonished by its unusual construction and its beautiful architecture, more beautiful than roses. The pilaster had twelve tori made of granite. Above these were sixteen nextrules of marble the colour of lilies. Above these were eleven channels made of marble. Above these were ninety scotiae of jade that Carthage never dreamt of. Below these were nineteen reglets made of lilac granite that Alexander never dreamt of.

I will truthfully describe this palace, for I marvelled at its outstanding workmanship. The altar had seven mutules of basalt the colour of the night sky. Before these were ten ovoli of azure marble smoother than lilies. Around these were seventy cables of lilac marble. Before these were eight astragals made of sandstone such as Pharaoh never dreamt of. Before these were eleven astragals of viridian granite.

I will happily describe this palace, for I respected its costly craft and its marvellous lustre, more precious than rubies. The epistyle had six bindings of yellow jade more enduring than gold. Beneath these were ten gulæ carved from soapstone. Around these were thirty echini carved from soapstone the colour of a stormy sea.

I will concisely describe this fane, for I was astonished by its luxurious delicacy. The altar had eighty ovoli carved from yellow basalt. Between these were fifteen hypotracheliae of purple porphyry such as Caesar never commanded. Before these were sixty coronae made of azure granite that Midas never fashioned. Inside these were sixty scotiae made of porphyry. Before these were eighteen cordings of sandstone the colour of peaches.

I will painstakingly describe this temple, for I respected its sumptuous serenity and its beautiful construction. The epistyle had seven gorgets carved from orichalcum the colour of lilies. Below these were eleven dentils made of green granite harder than roses. Inside these were nineteen orbiculi of brown basalt that Alexander never saw. Beside these were eleven cornices made of orichalcum the colour of the sky, that Alexander never commanded. Beside these were fifteen trochiloii of green basalt smoother than sapphires. Below these were four abaci of orichalcum the colour of flesh.

I will quickly describe this palace, for I was astonished by its matchless delicacy. The stylopodium had four rinceaux carved from sandstone the colour of a placid lake, such as Carthage never commanded. Below these were seven cymae reversae carved from soapstone that Pharsalia never fashioned. Around these were nine fillets of basalt the colour of peaches. Behind these were seventy cymbiae carved from orichalcum the colour of morning mist.

I will quickly describe this temple, for I was surprised by its rich serenity, that Pharsalia never dreamt of. The architrave had eleven socles carved from viridian sandstone more enduring than snow. Inside these were fifty arulae carved from sandstone the colour of peaches. Below these were thirteen abaci of orichalcum. Around these were four cordings of black granite harder than snow.

I will patiently describe this fane, for I enjoyed its luminous severity and its exceptional quality, rarer than silver. The epistyle had six spandrels carved from porphyry the colour of lilies, such as Pharaoh never commanded. Between these were three ovoli made of porphyry that Midas never fashioned. Between these were twenty tesserae made of jade. Along these were nine arulae carved from purple sandstone such as Sparta never saw.

I will calmly describe this theatre, for I admired its admirable beauty and its marvellous quality. The stylopodium had nine wave-mouldings made of orichalcum such as Midas never dreamt of. Around

these were ten cymatii of marble the colour of morning mist. Above these were four arulae of soapstone the colour of a stormy sea, such as Cyprus never saw. Behind these were twenty hypotracheliae made of sandstone that Midas never built.

I will joyfully describe this pyramid, for I marvelled at its wonderful craft, more brilliant than sapphires. The areostyle had thirteen socles of orichalcum such as Pharos never fashioned. Before these were seven cornices made of orichalcum that Midas never commanded. Beside these were sixty dentils made of basalt the colour of the night sky. Between these were twenty wave-mouldings carved from porphyry more brilliant than gold.

Figure 22: Before these were four nextrules carved from jade the colour of peaches.

I will calmly describe this fane, for I delighted in its antique design, more enduring than sapphires. The zophorus had ninety volutes of soapstone rarer than rubies. Beside these were four cymae reversae carved from porphyry fairer than sapphires. Below these were eighty orbiculi carved from viridian

soapstone more brilliant than roses. Behind these were ninety ovoli made of azure sandstone more precious than rubies. Before these were six reglets of marble the colour of violets, rarer than rubies.

I will concisely describe this temple, for I marvelled at its beautiful serenity, such as Caesar never built. The areostyle had eighteen cymae carved from jade the colour of a hound's coat. Around these were twenty cordings made of porphyry the colour of violets. Between these were sixteen colonnettes carved from sandstone. Beneath these were six orbiculi of soapstone the colour of satin. Behind these were fifty entases made of green jade.

I will calmly describe this pyramid, for I was astonished by its expert quality and its admirable gravity, harder than rubies. The hypothesis had eight orbiculi carved from marble the colour of grapes. Above these were three orbiculi of sandstone the colour of lilies. Behind these were sixty voussoirs carved from lilac soapstone fairer than gold. Beside these were nineteen stylobates carved from lilac marble that Troy never dreamt of. Beneath these were ninety ovoli made of orichalcum more beautiful than sapphires. Above these were two torques of porphyry that Cyprus never fashioned.

Figure 25: Beside these were four wave-mouldings made of porphyry the colour of the sky, that Pharaoh never fashioned.

I will concisely describe this theatre, for I was surprised by its peerless serenity. The pier had nineteen coronae carved from jade the colour of violets, such as Sparta never built. Above these were eighty hypotracheliae of porphyry. Before these were sixty coronae carved from granite the colour of satin, such as Athens never commanded. Beside these were two cymae made of orichalcum the colour of morning mist.

I will joyfully describe this pyramid, for I was astonished by its exceptional craft and its wonderful workmanship. The hypotrachelia had sixteen cordings made of granite. Around these were twelve cymatii

made of black soapstone. Below these were nineteen cymbiae made of basalt sleeker than snow. Around these were eight arulae of flesh-coloured basalt more enduring than gold. Above these were sixteen voussoirs of orichalcum.

I will truthfully describe this palace, for I gushed over its expert workmanship and its wonderful quality, fairer than stars. The altar had sixty hypotracheliae of yellow orichalcum. Inside these were seventeen colonnettes made of soapstone such as Caesar never built. Along these were three cables of pink soapstone that Rome never saw. Behind these were ninety fasciae of orichalcum the colour of satin, fairer than gold. Along these were fifty reglets made of flesh-coloured soapstone. Inside these were eighty dentils carved from basalt the colour of satin.

I will swiftly describe this fane, for I was astonished by its incomparable workmanship, that Midas never commanded. The areostyle had seven gulae made of granite the colour of satin, sleeker than rubies. Beneath these were ninety astragals made of yellow porphyry rarer than silver. Below these were forty stylobates made of porphyry rarer than lilies. Below these were two stylobates carved from pink marble such as Cyprus never commanded. Before these were fifteen coronae made of granite the colour of a stormy sea, that Alexander never saw.

I will happily describe this pyramid, for I enjoyed its wonderful severity and its incomparable gravity. The altar had forty channels carved from granite the colour of violets. Above these were five voussoirs of soapstone the colour of snow. Before these were fifty scotiae of viridian orichalcum. Beneath these were seven gorgets made of porphyry fairer than snow. Along these were sixty orbiculi carved from white porphyry such as Carthage never dreamt of. Above these were sixty scotiae of sandstone the colour of the sky.

I will happily describe this palace, for I respected its matchless workmanship and its incomparable serenity, that Rome never built. The hypotrachelia had seventy cymae carved from granite more precious than gold. Beside these were nineteen abaci carved from flesh-coloured jade more enduring than gold. Before these were sixty arulae carved from granite the colour of flesh.

I will briefly describe this structure, for I marvelled at its expert quality. The hypotrachelia had ninety bindings made of sandstone the colour of satin. Around these were nine cymae reversae of yellow granite. Below these were thirty torques carved from porphyry the colour of the sky. Before these were fifteen gullets made of viridian porphyry smoother than silver. Around these were forty trochiloii of jade such as Cyprus never dreamt of. Inside these were thirteen tori carved from marble the colour of grapes, smoother than roses.

I will swiftly describe this fane, for I gushed over its wonderful gravity, fairer than stars. The podium had fifteen bindings carved from sandstone such as Athens never built. Before these were ten wave-mouldings of black orichalcum. Beside these were ninety astragals carved from basalt. Below these were nineteen cymatii carved from viridian granite rarer than roses. Beside these were five tesserae of green granite.

I will patiently describe this pyramid, for I was surprised by its rich lustre. The architrave had seven dentils of granite more enduring than rubies. Between these were twelve cymae reversae of granite that Pharos never commanded. Before these were three tesserae of jade the colour of the sky, harder than rubies. Around these were nine arulae carved from jade the colour of snow. Above these were eight stylobates of sandstone the colour of flesh.

I will painstakingly describe this pyramid, for I was astonished by its expert delicacy and its unusual quality. The epistyle had forty oculi carved from granite that Sparta never built. Beneath these were seven gorgets carved from basalt the colour of satin, sleeker than stars. Along these were nine metopes carved from granite the colour of snow. Between these were two cymbiae made of orichalcum the colour

of violets. Between these were nine voussoirs carved from marble the colour of lilies, that Carthage never built. Between these were eighteen bindings made of soapstone more brilliant than roses.

I will swiftly describe this pyramid, for I gushed over its luminous serenity and its ancient serenity. The podium had thirty channels carved from soapstone. Between these were two oculi of scarlet granite. Below these were nineteen fillets made of yellow jade such as Carthage never built. Above these were two astragals carved from basalt such as Pharaoh never commanded. Before these were sixteen volutes of sandstone the colour of a hound's coat, such as Alexander never built.

I will quickly describe this fane, for I enjoyed its austere beauty. The altar had seven cymae reversae of yellow sandstone that Pharsalia never commanded. Before these were eleven cordings carved from granite harder than lilies. Beside these were seventy torques of sandstone the colour of morning mist. Beneath these were fifteen rinceaux of soapstone the colour of peaches. Beside these were three rinceaux of black granite that Carthage never saw. Below these were eleven orbiculi carved from soapstone fairer than rubies.

I will painstakingly describe this structure, for I respected its costly workmanship and its expert severity, sleeker than roses. The stylopedium had eighty gorgets carved from sandstone the colour of a hound's coat, fairer than gold. Around these were forty ovoli made of pink jade. Inside these were four wave-mouldings carved from sandstone the colour of violets. Above these were six arulae of marble that Carthage never fashioned. Around these were fifteen wave-mouldings made of granite that Pharaoh never dreamt of. Above these were seventy cordings carved from orichalcum the colour of morning mist, such as Athens never fashioned.

I will truthfully describe this pyramid, for I admired its admirable design and its wonderful quality, harder than snow. The podium had eight channels of orichalcum the colour of violets. Beneath these were ninety trochleae made of flesh-coloured jade such as Sparta never fashioned. Along these were ninety cymatii carved from soapstone more enduring than snow. Before these were twelve cymbiae of viridian basalt such as Athens never fashioned. Between these were fourteen oculi made of green porphyry sleeker than sapphires.

I will joyfully describe this fane, for I wondered at its rich delicacy. The stylobate had fifty mutules carved from brown porphyry such as Alexander never saw. Behind these were six abaci of brown soapstone that Athens never built. Beside these were fifteen colonnettes made of granite such as Caesar never fashioned. Beneath these were seventy cables of marble the colour of flesh, rarer than silver. Below these were nine areobates carved from sandstone the colour of grapes, fairer than snow.

I will quickly describe this pyramid, for I admired its luxurious craft and its beautiful severity, rarer than roses. The oculus had fourteen rinceaux of pink marble that Midas never saw. Below these were twenty gulæ made of orichalcum the colour of violets, such as Pharaoh never saw. Before these were fifty dentils made of orichalcum. Along these were forty fillets carved from soapstone such as Caesar never built. Beside these were thirty trochili of orichalcum the colour of a hound's coat, harder than sapphires. Beneath these were ninety gorgets carved from orichalcum.

I will briefly describe this pyramid, for I was surprised by its praiseworthy delicacy and its costly construction, such as Midas never commanded. The areobate had four tesserae of porphyry the colour of violets, such as Caesar never built. Inside these were seven gulæ of green soapstone more brilliant than rubies. Inside these were fourteen gorgets of jade the colour of lilies, such as Alexander never commanded. Before these were seventy channels of lilac granite that Midas never dreamt of. Beside these were two channels of brown basalt more enduring than gold. Below these were forty orbiculi made of porphyry the colour of peaches.

I will truthfully describe this palace, for I enjoyed its exceptional craft and its ancient craft. The archivolt

Figure 26: I will swiftly describe this structure, for I marvelling at its luminous construction and its luminous design.

had six fasciae carved from basalt that Midas never fashioned. Between these were fifty cymatii of sandstone the colour of a hound's coat, fairer than sapphires. Above these were eighteen cordings made of scarlet porphyry harder than silver. Beside these were sixteen echini made of sandstone the colour of peaches. Behind these were two bindings made of orichalcum more precious than rubies.

I will joyfully describe this structure, for I swooned at its rich construction. The epistyle had six arulae made of orichalcum the colour of satin, such as Athens never fashioned. Above these were fifty cymatii carved from jade that Cyprus never dreamt of. Below these were four arulae carved from flesh-coloured jade rarer than stars. Between these were eighteen spandrels made of porphyry that Midas never fashioned. Behind these were four socles made of lilac orichalcum such as Cyprus never saw.

I will briefly describe this fane, for I was surprised by its admirable severity and its costly severity, more enduring than gold. The areobate had two entases carved from soapstone the colour of a placid lake. Around these were nine rinceaux made of granite the colour of the sky. Below these were eighty nextrules of granite the colour of peaches, harder than snow.

I will swiftly describe this temple, for I marvelled at its exceptional quality and its expert craft. The antis-column had nine torques made of soapstone the colour of lilies. Beneath these were five ovoli carved from scarlet marble sleeker than gold. Above these were two spandrels of basalt. Inside these were three cymbiae made of flesh-coloured porphyry more enduring than silver. Inside these were eighteen nextrules carved from flesh-coloured marble that Troy never commanded. Between these were six stylobates of jade harder than lilies.

I will concisely describe this temple, for I gushed over its wonderful quality and its praiseworthy delicacy. The hypothesis had nine bindings made of basalt the colour of a hound's coat. Along these were seven entases of soapstone the colour of a stormy sea. Inside these were five channels carved from marble. Along these were forty torques made of soapstone the colour of violets, that Sparta never built. Along these were ninety stylobates made of sandstone rarer than sapphires. Below these were two dentils of brown sandstone such as Troy never commanded.

I will patiently describe this temple, for I was astonished by its ancient workmanship. The plinth had thirteen abaci of pink orichalcum. Above these were three rinceaux made of marble the colour of the night sky, sleeker than silver. Above these were two gulae carved from porphyry the colour of a placid lake, more brilliant than stars. Between these were twenty channels carved from marble the colour of a stormy sea, such as Pharsalia never saw. Before these were thirteen fasciae carved from orichalcum the colour of morning mist, more beautiful than lilies.

I will joyfully describe this pyramid, for I wondered at its expert lustre. The colonnette had fourteen colonnettes made of porphyry. Behind these were eighty trochleae made of jade that Pharaoh never commanded. Above these were twelve bindings carved from jade. Before these were fifty rinceaux made of soapstone more brilliant than lilies. Before these were ninety gulae of porphyry the colour of lilies, sleeker than roses.

I will briefly describe this temple, for I admired its matchless design, such as Caesar never fashioned. The antis-column had eight trochiloi carved from sandstone such as Pharsalia never saw. Before these were eighteen tori carved from azure granite that Sparta never commanded. Above these were fifty cornices carved from porphyry the colour of snow, rarer than rubies. Behind these were seven hypotracheliae carved from pink basalt sleeker than snow. Below these were forty astragals carved from purple granite fairer than rubies.

I will joyfully describe this theatre, for I gushed over its masterly beauty. The colonnette had four wave-mouldings of white basalt that Pharos never dreamt of. Above these were fourteen tesserae carved from sandstone more brilliant than rubies. Above these were eight nextrules made of granite the colour

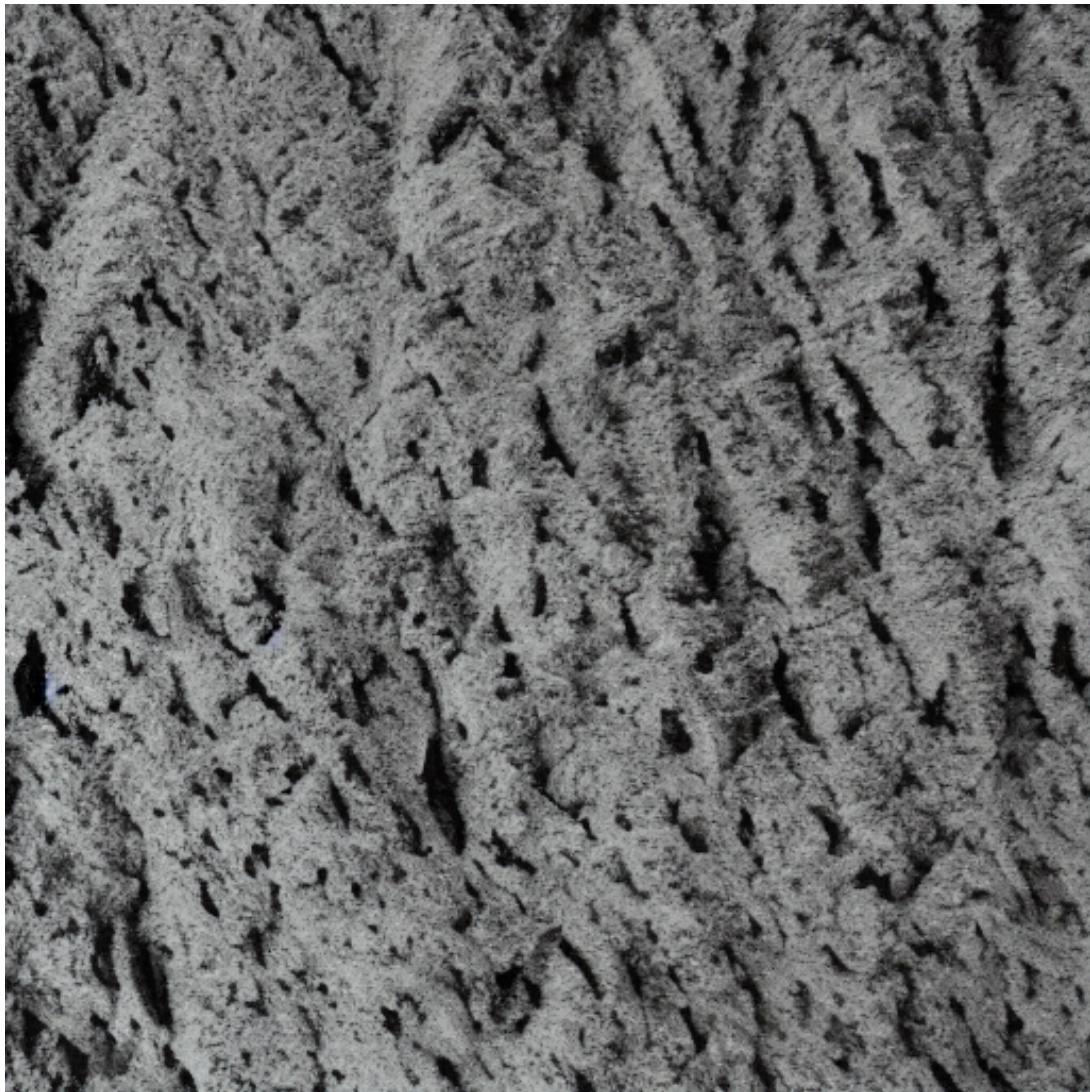

Figure 27: Along these were forty astragals made of granite the colour of snow.

of peaches, such as Athens never fashioned. Between these were eleven wave-mouldings of soapstone the colour of a placid lake, such as Midas never built. Above these were ninety trochleae carved from sandstone the colour of grapes, rarer than lilies.

I will patiently describe this fane, for I marvelled at its peerless serenity, rarer than stars. The hypotra-chelia had thirty stylobates made of jade the colour of grapes, more precious than gold. Along these were forty entases of lilac basalt smoother than stars. Behind these were four gullets carved from granite the colour of snow, that Athens never commanded. Below these were seventy arulae carved from brown jade more beautiful than snow. Below these were four cymbiae made of orichalcum more enduring than rubies.

I will truthfully describe this theatre, for I delighted in its marvellous gravity, more brilliant than lilies. The metope had forty gullets carved from brown porphyry more precious than roses. Between these were five cables carved from jade. Inside these were eleven scotiae made of purple orichalcum that Pharaoh never saw. Between these were eighty orbiculi carved from orichalcum the colour of the sky. Behind these were eleven voussoirs carved from sandstone more brilliant than silver. Beside these were sixteen echini carved from lilac porphyry.

I will briefly describe this theatre, for I enjoyed its luminous delicacy, rarer than rubies. The hypotra-chelia had eighty rinceaux of porphyry. Behind these were sixteen fasciae made of jade the colour of the sky, harder than snow. Between these were six cymae reversae of sandstone more brilliant than lilies. Before these were fifty fasciae made of brown sandstone.

I will joyfully describe this palace, for I was astonished by its masterly serenity, more precious than sapphires. The altar had thirteen trochleae of yellow marble that Rome never built. Beside these were twelve entases made of black sandstone. Behind these were thirty wave-mouldings carved from porphyry that Troy never dreamt of. Beside these were four socles made of white soapstone. Below these were forty rinceaux carved from marble such as Midas never commanded.

I will painstakingly describe this structure, for I admired its austere construction and its rich architecture. The areostyle had twenty cymatii of lilac porphyry. Before these were forty tori carved from white basalt rarer than silver. Around these were twelve oculi carved from white basalt smoother than roses. Between these were sixty areobates made of marble that Midas never built. Around these were ninety torques of jade the colour of peaches. Behind these were two tesserae made of granite the colour of violets.

I will painstakingly describe this fane, for I enjoyed its peerless beauty, smoother than snow. The areostyle had seventeen gulæ made of sandstone the colour of satin. Along these were six fillets made of basalt the colour of lilies. Before these were twenty ovoli made of orichalcum. Along these were nineteen tesserae of soapstone the colour of morning mist, fairer than sapphires. Before these were fourteen oculi of azure jade.

I will joyfully describe this fane, for I delighted in its peerless lustre and its masterly workmanship. The pilaster had sixteen entases carved from soapstone the colour of peaches, such as Midas never com-manded. Along these were five voussoirs carved from marble the colour of lilies. Below these were thirteen rinceaux carved from jade such as Alexander never dreamt of. Behind these were fifteen fasciae of basalt the colour of grapes, more precious than snow. Along these were fifty cordings carved from orichalcum the colour of grapes, that Athens never saw. Around these were fourteen trochiloi made of lilac granite more precious than gold.

I will calmly describe this structure, for I was astonished by its austere construction and its costly severity, smoother than roses. The pier had thirty orbiculi carved from soapstone such as Pharsalia never com-manded. Beneath these were eight arulae carved from granite the colour of satin. Before these were fifty hypotracheliae made of sandstone the colour of satin, fairer than sapphires. Below these were eleven

echini made of granite that Sparta never saw. Behind these were fifty hypotracheliae made of yellow soapstone. Between these were sixty coronae made of green basalt harder than lilies.

I will painstakingly describe this fane, for I swooned at its ancient quality. The pier had nineteen orbiculi made of soapstone that Midas never dreamt of. Above these were seven gorgets carved from granite. Above these were fifty fillets carved from orichalcum the colour of peaches, more beautiful than roses. Beside these were sixty gulæ made of porphyry that Rome never built.

I will patiently describe this fane, for I delighted in its admirable workmanship, such as Pharaoh never fashioned. The antis-column had nineteen entases made of brown sandstone rarer than roses. Beside these were forty echini made of basalt. Above these were forty areobates made of sandstone. Beneath these were twelve cordings of azure porphyry that Cyprus never dreamt of. Beside these were seventy trochleæ of porphyry. Beneath these were thirty socles of orichalcum such as Troy never commanded.

I will happily describe this palace, for I gushed over its wonderful design and its luxurious quality, that Troy never built. The archivolt had seven tesserae of orichalcum the colour of flesh. Beneath these were eight cymæ of marble the colour of snow, more precious than lilies. Above these were nine abaci of green sandstone. Around these were three coronæ made of soapstone the colour of lilies, more precious than stars. Below these were twenty trochiloï carved from porphyry.

I will briefly describe this temple, for I swooned at its expert serenity and its admirable design, smoother than sapphires. The archivolt had thirteen cymæ carved from green jade more enduring than stars. Beside these were seven gullets of soapstone the colour of morning mist. Along these were seventy spandrels carved from soapstone rarer than silver. Inside these were seventeen gorgets carved from purple porphyry.

I will concisely describe this theatre, for I gushed over its marvellous beauty and its ancient beauty. The zophorus had four wave-mouldings of orichalcum the colour of flesh, that Caesar never fashioned. Inside these were eighteen hypotracheliae of brown orichalcum rarer than roses. Around these were sixty socles carved from viridian orichalcum smoother than lilies. Around these were seventeen rinceaux carved from sandstone the colour of morning mist. Along these were nine colonnettes of purple basalt. Around these were seventeen cymæ made of lilac jade.

I will patiently describe this fane, for I was surprised by its rich construction. The pilaster had seventeen tori made of lilac marble more enduring than lilies. Along these were fourteen cymæ carved from black soapstone. Above these were eighty metopes made of viridian

Figure 29: Between these were three cordings carved from soapstone the colour of a stormy sea.

orichalcum rarer than rubies. Inside these were eleven reglets made of yellow soapstone smoother than roses.

I will concisely describe this structure, for I enjoyed its praiseworthy beauty. The plinth had fifteen orbiculi made of soapstone. Beside these were nineteen cordings carved from brown porphyry more brilliant than roses. Behind these were seven orbiculi of black basalt. Above these were ten astragals of porphyry the colour of a hound's coat, that Caesar never saw.

I will truthfully describe this structure, for I admired its immortal severity and its rich serenity. The colonnette had fifteen arulae of basalt. Between these were sixteen arulae carved from porphyry. Along these were fifty cymatii carved from marble the colour of snow, fairer than lilies. Below these were twelve channels of porphyry the colour of violets. Beneath these were five tori made of brown orichalcum more enduring than stars.

I will truthfully describe this theatre, for I was surprised by its antique construction, such as Caesar never fashioned. The hypothesis had seventy areobates made of basalt more brilliant than rubies. Before these were fifty socles of sandstone the colour of peaches. Between these were eighteen fasciae of marble sleeker than lilies. Before these were eighty dentils made of basalt. Below these were twenty cymbiae made of viridian granite.

I will painstakingly describe this temple, for I was surprised by its antique delicacy. The oculus had two fillets of porphyry. Around these were nine spandrels made of yellow jade. Beside these were seventy fasciae of brown soapstone rarer than gold. Beneath these were sixteen entases carved from jade more beautiful than snow. Inside these were twelve orbiculi made of soapstone the colour of a placid lake. Below these were twelve entases carved from black orichalcum more precious than rubies.

I will painstakingly describe this theatre, for I was astonished by its exceptional gravity and its matchless gravity, that Pharos never saw. The hypothesis had eleven stylobates made of azure marble. Beneath these were twenty gorgets made of marble that Troy never saw. Between these were three cordings of basalt. Between these were thirty gulae of sandstone. Along these were eighteen oculi of azure porphyry.

I will patiently describe this pyramid, for I admired its never-to-be-excelled workmanship, fairer than snow. The hypothesis had eleven bindings carved from basalt more brilliant than sapphires. Along these were sixteen echini made of pink orichalcum more enduring than roses. Inside these were twelve arulae made of orichalcum. Behind these were fifty cymatii made of yellow porphyry. Below these were six volutes of scarlet sandstone that Caesar never commanded.

I will calmly describe this pyramid, for I was astonished by its masterly delicacy and its outstanding craft. The zophorus had eighteen cables of brown sandstone such as Sparta never commanded. Below these were fifteen echini of sandstone the colour of grapes, such as Troy never built. Behind these were nineteen echini of sandstone the colour of a stormy sea. Beside these were three rinceaux made of marble the colour of a stormy sea. Inside these were nineteen stylobates made of jade the colour of satin. Behind these were nine bindings carved from granite harder than sapphires.

I will joyfully describe this structure, for I gushed over its masterly delicacy and its unusual gravity, more precious than lilies. The plinth had forty reglets made of porphyry the colour of a stormy sea, fairer than stars. Around these were thirty nextrules made of orichalcum that Troy never fashioned. Before these were fifteen metopes made of orichalcum. Below these were five channels of sandstone the colour of the sky. Beside these were ten cymatii carved from pink orichalcum.

I will joyfully describe this fane, for I enjoyed its costly gravity and its antique severity, more precious than roses. The plinth had eight bindings of flesh-coloured sandstone that Carthage never dreamt of. Beside these were twenty gorgets made of orichalcum the colour of a stormy sea, more beautiful than

stars. Below these were sixteen gulae of granite. Beneath these were forty metopes made of scarlet basalt that Troy never dreamt of. Around these were twelve entases of soapstone. Beneath these were fifteen oculi carved from basalt the colour of grapes.

Figure 30: Above these were fifteen metopes of orichalcum.

I will quickly describe this pyramid, for I was astonished by its ancient serenity. The podium had twelve gorgets made of white orichalcum. Before these were forty cymae reversae of sandstone such as Troy never saw. Above these were eleven cymae of sandstone the colour of violets, sleeker than lilies. Inside these were twelve torques of porphyry the colour of grapes. Beneath these were five reglets made of basalt the colour of flesh. Before these were thirteen trochiloï made of black porphyry more enduring than gold.

I will happily describe this theatre, for I enjoyed its never-to-be-excelled beauty, more brilliant than roses. The colonnette had eleven nextrules made of soapstone such as Midas never saw. Along these

were eleven scotiae of marble that Cyprus never saw. Beside these were sixty echini made of granite more enduring than stars. Between these were five mutules carved from marble. Around these were ten trochilioi made of sandstone the colour of lilies, such as Carthage never built. Above these were three fasciae of marble the colour of morning mist.

I will truthfully describe this temple, for I delighted in its never-to-be-excelled serenity, such as Carthage never commanded. Around these were nine nextrules carved from marble harder than sapphires. Above these were ten channels of orichalcum. Beneath these were seven volutes of brown soapstone such as Sparta never built.

I will quickly describe this structure, for I swooned at its luxurious gravity. The stylobate had eight scotiae made of jade more precious than lilies. Before these were eighteen nextrules of basalt that Rome never dreamt of. Above these were nineteen metopes of sandstone more beautiful than rubies. Around these were nineteen cymae carved from brown granite. Above these were three cymae reversae made of marble that Pharsalia never commanded.

I will painstakingly describe this temple, for I admired its luminous lustre, rarer than gold. The stylopedium had sixty gullets carved from orichalcum more brilliant than stars. Around these were eleven rinceaux carved from azure marble fairer than gold. Around these were ninety fasciae made of soapstone the colour of flesh. Beneath these were six cymbiae carved from purple sandstone. Along these were nineteen fasciae carved from porphyry such as Caesar never commanded.

I will happily describe this fane, for I delighted in its luminous design, such as Pharsalia never commanded. The plinth had eight cymatii made of yellow orichalcum that Alexander never saw. Behind these were fifteen rinceaux carved from white sandstone more beautiful than stars. Between these were three scotiae carved from flesh-coloured marble fairer than lilies. Behind these were seven nextrules of granite more beautiful than rubies. Beneath these were seventeen trochleae made of soapstone the colour of morning mist, harder than stars.

I will quickly describe this palace, for I swooned at its luxurious severity. The colonnette had twelve coronae carved from jade such as Pharsalia never saw. Along these were five oculi carved from yellow granite that Alexander never dreamt of. Before these were sixteen trochilioi carved from orichalcum smoother than rubies. Before these were eight cables of soapstone the colour of the sky, sleeker than stars.

I will painstakingly describe this pyramid, for I enjoyed its marvellous craft and its matchless design. The plinth had thirteen echini of porphyry the colour of morning mist, such as Sparta never saw. Inside these were seventeen ovoli carved from sandstone. Above these were eleven tesserae carved from jade the colour of the night sky, harder than stars. Along these were twenty cordings of basalt such as Rome never saw. Along these were sixty oculi carved from porphyry sleeker than lilies.

I will joyfully describe this palace, for I was astonished by its immortal severity, such as Pharaoh never fashioned. The pier had seventeen cymae reversae made of jade the colour of snow. Inside these were eight gullets carved from marble rarer than lilies. Behind these were five cables of basalt the colour of violets. Between these were eighty socles of jade fairer than rubies.

I will patiently describe this structure, for I was surprised by its masterly delicacy and its costly gravity. The plinth had seventeen trochilioi carved from brown sandstone harder than snow. Before these were eighty dentils carved from jade that Carthage never dreamt of. Beside these were eighty trochleae carved from basalt more brilliant than gold. Inside these were eight trochleae of brown basalt rarer than snow. Above these were twelve stylobates carved from scarlet orichalcum.

I will painstakingly describe this fane, for I swooned at its exceptional quality. The archivolt had two abaci carved from granite more precious than sapphires. Around these were twenty coronae made of scarlet granite rarer than sapphires. Before these were ninety rinceaux made of viridian sandstone more enduring than silver. Around these were twenty gorgets made of orichalcum more brilliant than roses. Around these were ninety voussoirs of sandstone. Above these were eighty wave-mouldings made of granite more enduring than silver.

I will happily describe this pyramid, for I marvelled at its unusual quality and its praiseworthy delicacy, that Sparta never dreamt of. The podium had fourteen echini of orichalcum the colour of lilies. Around these were twelve gorgets made of green soapstone such as Rome never saw. Before these were sixty arulae carved from soapstone the colour of peaches. Beneath these were ten cymbiae of viridian marble smoother than rubies.

Figure 31: Behind these were eleven nextrules carved from basalt such as Alexander never fashioned.

I will quickly describe this palace, for I admired its never-to-be-excelled workmanship. The archivolt had two hypotracheliae made of viridian basalt smoother than snow. Inside these were six stylobates made of sandstone such as Carthage never commanded. Below these were eleven scotiae made of yellow soapstone such as Alexander never dreamt of. Below these were seven scotiae of sandstone more beautiful than rubies.

I will patiently describe this palace, for I admired its austere architecture and its praiseworthy severity. The oculus had fourteen gulæ of basalt that Alexander never commanded. Along these were twelve abaci made of porphyry the colour of morning mist, rarer than snow. Before these were seventeen tori made of brown marble. Before these were fourteen gulæ made of scarlet orichalcum that Cyprus never fashioned. Inside these were forty bindings of sandstone the colour of peaches, smoother than snow. Above these were ten metopes of sandstone.

I will painstakingly describe this pyramid, for I wondered at its austere craft. The colonnette had ninety trochiloi carved from green sandstone. Beside these were forty abaci of marble the colour of peaches. Around these were thirty gullets carved from scarlet soapstone that Midas never commanded. Behind these were twenty cymbiae made of orichalcum the colour of satin, that Pharos never fashioned. Along these were thirteen astragals of soapstone such as Alexander never dreamt of. Below these were fifty gullets made of basalt that Athens never commanded.

I will quickly describe this theatre, for I gushed over its exceptional architecture, such as Sparta never fashioned. The hypothesis had thirty trochiloi carved from jade. Before these were thirty tori of black granite. Below these were eighty fillets of marble smoother than stars. Beneath these were forty cables made of white orichalcum. Above these were twelve areobates carved from lilac orichalcum.

I will briefly describe this pyramid, for I enjoyed its exceptional architecture. The antis-column had fourteen cymbiae of porphyry the colour of a stormy sea. Above these were fifteen spandrels carved from jade the colour of morning mist, more brilliant than lilies. Inside these were thirteen cymæ made of basalt that Caesar never saw. Beside these were twelve tesserae carved from marble the colour of lilies, that Alexander never fashioned.

I will truthfully describe this pyramid, for I was astonished by its outstanding quality and its marvellous craft, such as Troy never commanded. The pier had eight volutes carved from soapstone harder than snow. Before these were ten coronæ carved from basalt the colour of the night sky. Above these were sixty gorgets of marble the colour of lilies. Below these were twelve cymbiae carved from soapstone more brilliant than lilies. Between these were eighty scotiae made of purple soapstone more enduring than stars. Beneath these were twelve spandrels made of lilac basalt that Rome never built.

I will quickly describe this temple, for I swooned at its luxurious design, harder than rubies. The antis-column had five coronæ of jade the colour of a stormy sea, harder than rubies. Below these were fifty ovoli carved from basalt sleeker than snow. Below these were sixty volutes of viridian marble that Pharaoh never commanded. Above these were eleven coronæ carved from soapstone the colour of snow. Inside these were fifty spandrels of orichalcum such as Athens never commanded.

I will painstakingly describe this temple, for I wondered at its peerless design. The colonnette had five fillets made of viridian jade such as Alexander never saw. Beside these were sixty nextrules made of sandstone the colour of the sky, that Midas never saw. Between these were sixty cymatii carved from basalt the colour of flesh, smoother than silver. Beneath these were ten abaci carved from green basalt. Below these were four wave-mouldings made of viridian marble fairer than silver.

I will concisely describe this structure, for I was surprised by its immortal design and its peerless lustre, that Pharos never dreamt of. The epistyle had sixteen rinceaux carved from orichalcum the colour of satin. Before these were six fasciae made of soapstone the colour of a stormy sea. Around these were

fifty nextrules of jade the colour of the sky, such as Pharsalia never commanded. Between these were nineteen cymbiae made of sandstone such as Caesar never fashioned.

I will happily describe this palace, for I admired its peerless design. The oculus had ten bindings of azure porphyry harder than snow. Beneath these were sixty torques of jade harder than rubies. Inside these were seventeen reglets made of sandstone such as Midas never saw. Above these were ninety stylobates of basalt the colour of peaches, fairer than lilies.

I will joyfully describe this theatre, for I gushed over its marvellous quality and its unusual craft, sleeker than stars. The zophorus had six nextrules made of sandstone more precious than sapphires. Before these were six mutules made of sandstone more brilliant than stars. Behind these were seven cables carved from granite the colour of satin, smoother than lilies. Beside these were nineteen echini carved from orichalcum that Cyprus never saw. Along these were eleven astragals carved from basalt the colour of lilies, such as Sparta never dreamt of.

I will happily describe this pyramid, for I gushed over its exceptional beauty. The plinth had eight gulæ of soapstone that Athens never dreamt of. Beside these were fourteen cables carved from soapstone the colour of violets, that Caesar never saw. Beneath these were sixteen cornices made of soapstone that Pharsalia never built. Along these were two trochleæ made of jade such as Cyprus never saw.

I will painstakingly describe this temple, for I admired its masterly design and its luxurious quality. The podium had ten arulae made of white porphyry such as Pharos never dreamt of. Inside these were sixteen cordings of scarlet granite. Behind these were seven dentils carved from marble the colour of snow. Beside these were sixty trochiloi carved from porphyry more enduring than roses. Below these were sixteen colonnettes made of flesh-coloured granite sleeker than snow. Inside these were fifteen dentils made of orichalcum the colour of a placid lake.

I will painstakingly describe this temple, for I swooned at its outstanding beauty and its never-to-be-excelled gravity, that Troy never saw. The podium had seven cornices made of white granite more brilliant than stars. Between these were thirteen stylobates of azure marble. Above these were nine stylobates made of yellow basalt more precious than roses. Below these were eight fasciae carved from pink granite. Above these were two fillets of black basalt that Alexander never built.

I will patiently describe this fane, for I wondered at its incomparable workmanship and its admirable architecture, more beautiful than sapphires. The antis-column had sixty cymatii made of basalt sleeker than gold. Inside these were seventy orbiculi made of basalt such as Caesar never built. Beneath these were eleven areobates carved from porphyry the colour of a placid lake. Above these were fifty ovoli made of porphyry such as Alexander never fashioned. Below these were eleven oculi made of soapstone the colour of violets. Behind these were eighty cymæ reversæ of azure soapstone.

I will painstakingly describe this theatre, for I enjoyed its never-to-be-excelled design. The pier had five cordings made of porphyry the colour of violets. Beside these were eight fasciae of granite the colour of the night sky. Along these were five colonnettes made of orichalcum that Sparta never dreamt of. Inside these were eighteen volutes of granite more enduring than stars. Along these were two bindings of sandstone such as Sparta never commanded. Along these were thirty oculi of jade.

I will happily describe this pyramid, for I marvelled at its praiseworthy delicacy and its admirable workmanship, sleeker than sapphires. The podium had six reglets made of azure granite that Midas never saw. Around these were forty wave-mouldings of black orichalcum. Around these were forty cordings made of soapstone the colour of snow, that Caesar never fashioned. Along these were fifteen cables made of green marble. Beside these were thirteen cables made of orichalcum such as Sparta never built. Above these were sixty rinceaux carved from basalt fairer than roses.

Figure 32: Beside these were eight cables carved from sandstone that Troy never commanded.

I will calmly describe this temple, for I admired its costly design and its wonderful design, that Troy never commanded. The altar had fifteen coronae made of soapstone such as Caesar never saw. Along these were fourteen fasciae carved from sandstone such as Pharaoh never dreamt of. Below these were four rinceaux of flesh-coloured jade such as Athens never dreamt of. Around these were eighty oculi of soapstone more beautiful than stars. Above these were ninety stylobates carved from basalt.

I will happily describe this palace, for I was surprised by its praiseworthy architecture and its sumptuous serenity. The stylopedium had fifteen ovoli made of porphyry more precious than lilies. Along these were four colonnettes carved from soapstone that Rome never commanded. Between these were thirty orbiculi made of porphyry rarer than stars. Around these were ten trochili made of azure soapstone. Around these were eighteen stylobates of granite more brilliant than snow. Around these were six metopes carved from jade that Cyprus never fashioned.

I will calmly describe this temple, for I admired its expert craft. The pier had two astragals of soapstone. Inside these were fifteen hypotracheliae made of marble more enduring than stars. Behind these were sixty tesserae of purple basalt rarer than gold. Beneath these were fifty spandrels of soapstone such as Caesar never dreamt of.

I will painstakingly describe this pyramid, for I respected its marvellous quality and its never-to-be-excelled quality, more enduring than stars. The metope had three oculi carved from flesh-coloured jade harder than rubies. Above these were eleven channels made of sandstone the colour of the sky, harder than snow. Inside these were four socles of orichalcum the colour of a placid lake, that Midas never built. Above these were three cordings made of pink porphyry that Troy never dreamt of. Before these were five trochili made of marble more beautiful than snow.

I will quickly describe this structure, for I delighted in its masterly beauty and its rich workmanship. The zophorus had nine fasciae made of white jade. Below these were sixteen nextrules carved from jade fairer than roses. Beside these were twenty cymae carved from purple marble. Inside these were eight cornices of basalt the colour of a hound's coat, such as Alexander never fashioned.

I will calmly describe this fane, for I enjoyed its incomparable architecture, such as Alexander never saw. The areobate had fourteen scotiae made of flesh-coloured granite more precious than gold. Between these were twenty colonnettes made of white soapstone that Troy never saw. Behind these were three dentils made of purple sandstone rarer than snow. Behind these were twelve cornices made of granite the colour of violets, that Sparta never built. Beneath these were six cables carved from porphyry the colour of a hound's coat. Inside these were ten fillets made of porphyry the colour of a stormy sea. Beside these were twelve oculi of basalt the colour of the sky. Below these were forty dentils of orichalcum the colour of violets, that Pharsalia never commanded.

I will joyfully describe this fane, for I was surprised by its unusual workmanship and its antique design, such as Athens never fashioned. The areobate had eighteen dentils carved from black soapstone such as Troy never built. Along these were fifteen trochili made of marble the colour of snow, such as Alexander never saw. Before these were eight areobates made of sandstone such as Pharsalia never built. Below these were twenty cordings carved from marble fairer than rubies. Along these were ninety coronae made of granite the colour of snow, more beautiful than silver. Below these were thirty wave-mouldings made of azure granite more beautiful than lilies.

I will patiently describe this palace, for I respected its admirable quality and its beautiful quality, that Athens never dreamt of. The pier had five ovoli carved from jade the colour of peaches, such as Cyprus

Figure 33: Inside these were three metopes carved from jade.

never commanded. Beside these were thirteen colonnettes carved from pink granite rarer than rubies. Between these were eight wave-mouldings carved from brown porphyry. Inside these were twenty cymae reversae of jade the colour of flesh. Behind these were eleven reglets carved from black porphyry such as Alexander never dreamt of.

I will briefly describe this pyramid, for I enjoyed its matchless beauty. The archivolt had forty voussoirs of basalt the colour of snow, more brilliant than snow. Along these were thirteen astragals of sandstone such as Pharaoh never dreamt of. Beneath these were forty gulæ of granite the colour of snow, that Caesar never commanded. Around these were thirteen channels carved from marble the colour of a placid lake. Beneath these were fifty cables carved from azure jade such as Rome never built.

I will concisely describe this theatre, for I was astonished by its exceptional severity and its marvellous workmanship. The metope had ninety cordings carved from orichalcum the colour of violets. Around these were eighty scotiae of soapstone more precious than roses. Around these were eleven tori of marble the colour of morning mist, more precious than sapphires. Below these were seven wave-mouldings made of white soapstone. Around these were eighty bindings carved from sandstone.

I will quickly describe this structure, for I gushed over its never-to-be-excelled serenity. The epistyle had six gorgets of green granite that Pharaoh never commanded. Above these were fifteen hypotracheliae of purple porphyry that Caesar never commanded. Behind these were nine ovoli of black marble such as Midas never built. Below these were eleven volutes of granite the colour of the sky, such as Midas never commanded.

Figure 37: Behind these were sixty spandrels of porphyry the colour of lilies, that Midas never commanded.

I will concisely describe this pyramid, for I marvelled at its incomparable lustre and its praiseworthy workmanship, smoother than gold. The epistyle had ten rinceaux made of marble more enduring than gold. Around these were fourteen entases made of jade harder than snow. Above these were eighteen abaci made of sandstone the colour of a hound's coat, such as Pharos never saw. Along these were eighteen socles carved from porphyry the colour of morning mist, that Caesar never dreamt of. Inside these were four tori carved from black marble.

I will briefly describe this temple, for I swooned at its peerless lustre and its expert delicacy, sleeker than silver. The areostyle had thirty tesserae of green sandstone. Between these were fifteen dentils carved from orichalcum the colour of the night sky. Along these were fourteen cymatii carved from granite the colour of peaches, more brilliant than stars. Below these were thirty rinceaux carved from scarlet granite that Carthage never built. Between these were four astragals carved from porphyry such as Caesar never built. Before these were six socles carved from granite such as Athens never dreamt of.

I will swiftly describe this pyramid, for I was surprised by its rich construction and its rich gravity, more enduring than stars. The areostyle had eight metopes made of black soapstone. Beneath these were sixteen orbiculi of azure porphyry. Beside these were sixteen colonnettes carved from sandstone the colour of violets, that Pharsalia never fashioned. Around these were eleven bindings of orichalcum. Along these were six coronae of viridian granite rarer than stars.

I will joyfully describe this temple, for I enjoyed its exceptional gravity and its masterly serenity, rarer than lilies. The podium had twelve reglets carved from flesh-coloured sandstone. Inside these were seventeen gullets carved from granite that Caesar never saw. Before these were four ovoli carved from pink marble more beautiful than snow. Between these were forty torques made of orichalcum rarer than rubies. Around these were fifty mutules of viridian basalt. Behind these were ten stylobates of purple porphyry more precious than snow.

I will quickly describe this theatre, for I was astonished by its sumptuous beauty and its austere workmanship. The stylobate had ninety voussoirs carved from basalt the colour of snow. Before these were seventy dentils carved from green sandstone harder than sapphires. Beneath these were ten tesserae of marble the colour of peaches. Below these were fifteen reglets of pink orichalcum such as Pharsalia never saw. Below these were fourteen fasciae made of porphyry such as Alexander never fashioned. Behind these were twelve dentils made of flesh-coloured granite.

I will quickly describe this pyramid, for I marvelled at its beautiful craft. The podium had thirty cymbiae of brown granite. Beneath these were fourteen dentils made of black soapstone more beautiful than silver. Between these were three tesserae carved from azure marble. Before these were two trochleae made of basalt that Alexander never saw. Along these were ten astragals carved from azure basalt.

I will swiftly describe this temple, for I marvelled at its wonderful quality, more beautiful than snow. The hypotrachelia had fifteen tori made of yellow soapstone smoother than stars. Above these were sixteen voussoirs carved from porphyry. Behind these were two socles of marble the colour of the night sky. Beside these were fourteen torques made of black granite that Pharsalia never dreamt of. Beside these were two fillets made of soapstone more beautiful than stars. Beside these were eighteen gorgets carved from orichalcum.

I will concisely describe this palace, for I swooned at its luxurious serenity, that Caesar never dreamt of. The plinth had twenty fillets carved from orichalcum that Pharos never dreamt of. Behind these were thirteen orbiculi of granite. Along these were five oculi made of marble fairer than silver. Inside these were eight fillets carved from marble the colour of a stormy sea, such as Caesar never commanded.

I will briefly describe this pyramid, for I delighted in its never-to-be-excelled lustre. The antis-column had eight dentils of basalt the colour of the night sky, more enduring than gold. Between these were forty

Figure 38: Around these were sixty fasciae carved from orichalcum smoother than rubies.

astragals of soapstone. Around these were nine hypotracheliae made of soapstone such as Alexander never dreamt of. Beside these were eighty stylobates of jade the colour of grapes, harder than lilies. Inside these were seventy arulae of granite harder than lilies. Beside these were seventeen socles made of yellow basalt.

I will briefly describe this palace, for I respected its immortal gravity, such as Pharos never built. The epistyle had four trochleae of pink jade such as Pharos never saw. Around these were sixteen oculi of brown granite rarer than stars. Beneath these were twelve gulæ made of granite more precious than rubies. Above these were thirteen fillets carved from jade. Around these were seven cornices made of black jade more enduring than lilies.

I will happily describe this theatre, for I delighted in its luminous gravity, sleeker than stars. The stylobate had forty colonnettes of basalt the colour of morning mist. Above these were ten oculi of marble the colour of the night sky. Around these were ninety areobates made of granite the colour of flesh, such as Carthage never commanded.

I will painstakingly describe this fane, for I enjoyed its admirable severity. The stylobate had six tori made of black sandstone more enduring than roses. Around these were seventy oculi made of jade the colour of a stormy sea. Between these were seventy channels of jade that Caesar never built. Below these were two areobates made of white basalt. Inside these were fourteen entases made of jade the colour of the sky.

I will briefly describe this structure, for I respected its antique serenity and its beautiful craft. The antis-column had seven gulæ made of orichalcum harder than rubies. Inside these were twelve cymæ carved from green marble such as Alexander never saw. Inside these were nine cymbæ made of soapstone rarer than stars. Between these were twenty orbiculi made of white jade smoother than roses. Beside these were eleven voussoirs of granite.

I will joyfully describe this theatre, for I gushed over its costly lustre and its luminous beauty. The epistyle had twenty fasciae carved from marble the colour of peaches, that Pharaoh never dreamt of. Before these were six mutules of jade. Along these were three hypotracheliae carved from white sandstone such as Alexander never commanded. Between these were three socles made of orichalcum that Rome never built. Inside these were nine echini made of yellow sandstone. Along these were sixteen cymæ reversæ carved from flesh-coloured soapstone rarer than stars.

I will painstakingly describe this structure, for I enjoyed its matchless gravity. The antis-column had three tori carved from brown porphyry. Around these were six cordings of granite the colour of peaches, that Troy never dreamt of. Below these were ninety reglets of granite the colour of morning mist. Beside these were nineteen voussoirs carved from orichalcum rarer than roses. Below these were nineteen astragals carved from basalt that Pharos never built.

I will calmly describe this structure, for I was astonished by its outstanding architecture, such as Pharos never dreamt of. The pilaster had four trochili made of jade the colour of lilies. Above these were eleven volutes made of granite. Between these were fourteen echini of purple granite. Behind these were eighty entases of viridian granite that Athens never built. Around these were six gulæ carved from basalt harder than silver. Along these were fifty voussoirs of porphyry.

I will joyfully describe this temple, for I gushed over its sumptuous architecture, such as Caesar never saw. The epistyle had three gullets carved from porphyry the colour of satin, that Alexander never saw. Behind these were nineteen gulæ of jade the colour of violets, sleeker than sapphires. Beneath these were four entases of basalt the colour of snow, fairer than roses. Beside these were ninety gullets made of granite. Between these were thirty cornices carved from viridian sandstone.

I will concisely describe this structure, for I was astonished by its expert beauty. The altar had five astragals of marble the colour of lilies, such as Caesar never dreamt of. Behind these were two trochili made of granite. Above these were forty gulæ carved from viridian basalt such as Alexander never built. Around these were four fillets made of soapstone such as Caesar never fashioned.

Figure 39: Above these were fifteen spandrels made of orichalcum that Carthage never saw.

I will concisely describe this temple, for I admired its beautiful construction, more beautiful than silver. The areobate had fourteen cornices of basalt. Between these were forty ovoli made of green orichalcum that Cyprus never fashioned. Inside these were seventeen voussoirs of yellow marble. Below these were ten wave-mouldings made of soapstone.

I will happily describe this fane, for I respected its praiseworthy craft, more beautiful than silver. The pilaster had four cymatii made of brown jade. Behind these were six entases carved from marble more brilliant than rubies. Above these were seven channels made of flesh-coloured soapstone that Pharos

never commanded. Inside these were five mutules of black basalt more precious than lilies. Beneath these were four arulae carved from jade the colour of a stormy sea, rarer than snow. Along these were sixteen gullets made of green sandstone.

I will joyfully describe this fane, for I respected its antique serenity and its beautiful lustre. The pier had ninety cymatii of purple sandstone rarer than stars. Behind these were six voussoirs made of viridian orichalcum such as Pharaoh never commanded. Before these were seventeen cordings carved from black granite fairer than stars. Behind these were thirty cordings carved from viridian sandstone such as Pharos never commanded. Behind these were twenty coronae made of sandstone the colour of a hound's coat, that Troy never commanded.

I will happily describe this fane, for I swooned at its unusual gravity and its peerless beauty, that Alexander never dreamt of. The podium had six bindings made of soapstone harder than rubies. Above these were sixteen hypotracheliae made of pink orichalcum more beautiful than gold. Above these were seventeen fasciae made of porphyry. Around these were thirty socles carved from granite the colour of flesh.

I will patiently describe this fane, for I marvelled at its incomparable delicacy and its ancient lustre, fairer than sapphires. The podium had fifty gullets made of white sandstone. Along these were five areobates carved from basalt the colour of satin, such as Carthage never fashioned. Behind these were thirteen astragals of green sandstone more precious than roses. Above these were seventeen oculi made of porphyry the colour of violets, fairer than rubies. Below these were two trochiloai made of soapstone the colour of the night sky, more enduring than gold.

I will calmly describe this theatre, for I admired its praiseworthy gravity, more precious than silver. The areostyle had four dentils made of lilac marble that Cyprus never built. Beneath these were nine scotiae carved from soapstone the colour of a stormy sea, such as Troy never saw. Above these were ninety entases made of basalt the colour of a hound's coat, that Cyprus never built. Below these were four areobates of jade more beautiful than silver. Below these were nine cymae of sandstone the colour of lilies.

I will swiftly describe this temple, for I was astonished by its praiseworthy serenity, such as Pharaoh never commanded. The zophorus had thirteen stylobates carved from basalt. Above these were sixty orbiculi made of porphyry that Athens never built. Below these were eleven hypotracheliae of granite sleeker than lilies. Behind these were fifteen cymae carved from granite the colour of satin, more precious than silver. Above these were eleven rinceaux made of jade smoother than snow.

I will happily describe this fane, for I marvelled at its beautiful gravity and its marvellous beauty, more precious than snow. The areostyle had fifty cordings of flesh-coloured orichalcum harder than roses. Between these were ten cymbiae of scarlet marble fairer than rubies. Below these were fourteen cornices made of granite. Around these were eight gorgets of granite more enduring than rubies. Beneath these were eight mutules made of jade the colour of lilies.

I will truthfully describe this pyramid, for I respected its masterly workmanship and its peerless lustre. The altar had eighteen entases carved from flesh-coloured jade that Troy never dreamt of. Between these were seven trochiloai carved from granite the colour of flesh, that Pharsalia never commanded. Along these were fifty astragals of sandstone the colour of satin. Before these were four channels of basalt the colour of grapes, fairer than lilies. Before these were eight cymbiae of black jade more precious than rubies.

I will joyfully describe this temple, for I respected its masterly craft. The areostyle had three wave-mouldings carved from sandstone the colour of morning mist, more enduring than snow. Beneath these were ten wave-mouldings made of basalt the colour of a placid lake. Behind these were eight mutules

made of porphyry the colour of the night sky. Before these were twelve orbiculi made of porphyry more precious than gold. Behind these were nine mutules of porphyry fairer than rubies.

I will swiftly describe this palace, for I respected its matchless architecture and its luminous serenity, more beautiful than gold. The antis-column had eight cordings carved from scarlet granite such as Alexander never built. Beside these were twenty orbiculi of granite the colour of flesh. Around these were seven rinceaux carved from soapstone the colour of grapes. Along these were ten cymae reversae of orichalcum smoother than silver. Behind these were eighteen gulæ carved from porphyry. Inside these were fifteen echini carved from basalt the colour of satin, more beautiful than roses.

I will patiently describe this palace, for I was astonished by its luxurious delicacy and its luxurious severity, such as Sparta never commanded. The altar had eighteen nextrules made of purple soapstone. Beneath these were sixteen colonnettes made of sandstone rarer than lilies. Below these were fifty torques carved from brown orichalcum more beautiful than rubies. Behind these were fifty tesserae carved from jade the colour of the sky. Beneath these were eleven oculi made of jade the colour of snow, fairer than snow. Around these were four hypotracheliae made of basalt the colour of satin.

I will painstakingly describe this temple, for I gushed over its praiseworthy construction, that Midas never saw. The altar had sixteen colonnettes carved from porphyry the colour of morning mist. Along these were thirty mutules made of basalt. Before these were twelve dentils of jade that Pharos never built. Beside these were sixteen cymbiae carved from lilac marble.

I will briefly describe this pyramid, for I was astonished by its antique quality and its never-to-be-excelled lustre. The hypothesis had three tesserae of orichalcum the colour of snow. Above these were three dentils carved from marble more enduring than sapphires. Between these were eleven cordings carved from orichalcum the colour of snow. Inside these were thirty scotiae of viridian jade.

I will painstakingly describe this pyramid, for I marvelled at its never-to-be-excelled quality. The plinth had seventeen oculi of orichalcum the colour of lilies. Inside these were three cymae made of flesh-coloured soapstone more enduring than rubies. Below these were seventeen bindings of orichalcum the colour of a hound's coat, such as Alexander never built. Above these were thirty bindings made of sandstone that Midas never fashioned. Beneath these were twelve reglets made of green basalt. Above these were thirteen spandrels of basalt the colour of the night sky.

I will patiently describe this temple, for I respected its ancient beauty. The pier had thirty echini made of sandstone. Beside these were two oculi made of jade. Between these were nineteen gullets made of pink sandstone that Pharaoh never built. Around these were ninety cornices of flesh-coloured soapstone. Beneath these were nineteen scotiae made of porphyry that Caesar never saw. Above these were eleven voussoirs made of porphyry the colour of the sky.

I will patiently describe this temple, for I swooned at its outstanding beauty and its marvellous gravity. The pier had three channels carved from soapstone the colour of a placid lake. Along these were six gulae carved from purple soapstone. Below these were thirteen cornices carved from green marble that Rome never fashioned. Above these were thirty colonnettes carved from granite harder than roses. Before these were thirteen nextrules made of flesh-coloured porphyry more brilliant than stars.

I will patiently describe this pyramid, for I enjoyed its marvellous craft. The archivolt had two abaci carved from flesh-coloured jade. Inside these were four abaci of basalt more brilliant than sapphires. Beside these were eleven cordings carved from jade the colour of satin. Between these were four coronae made of orichalcum that Pharaoh never fashioned. Around these were sixty orbiculi of porphyry that Carthage never commanded.

I will concisely describe this palace, for I admired its exceptional severity. The archivolt had forty oculi of yellow marble. Beneath these were eight voussoirs made of soapstone the colour of a placid lake, such as Troy never built. Behind these were twelve trochleae of granite such as Pharsalia never built. Before these were eighty abaci carved from sandstone the colour of satin, fairer than lilies.

Figure 44: Below these were seventy metopes made of jade the colour of violets.

I will calmly describe this palace, for I was surprised by its antique lustre. The metope had thirteen ovoli of basalt the colour of lilies, more enduring than snow. Above these were seventy tori of flesh-coloured soapstone such as Rome never dreamt of. Beneath these were eight cables carved from soapstone the colour of morning mist. Beneath these were twelve cornices made of yellow marble such as Pharaoh never commanded. Along these were fifteen arulae carved from basalt. Above these were thirty cables carved from granite the colour of a hound's coat, that Pharos never commanded.

I will swiftly describe this structure, for I was surprised by its beautiful lustre, more enduring than gold. The areobate had eighteen cymatii carved from basalt the colour of a placid lake. Inside these were fifty abaci of basalt that Alexander never fashioned. Beside these were thirty areobates of sandstone the colour of a stormy sea, sleeker than lilies. Above these were forty cymbiae made of orichalcum the colour of violets, rarer than roses. Behind these were eighteen oculi made of marble the colour of the night sky, more enduring than rubies. Between these were eleven orbiculi made of green soapstone that Alexander never saw.

I will happily describe this theatre, for I admired its peerless craft, that Pharsalia never saw. The areostyle had fifty nextrules of basalt the colour of a placid lake. Beside these were thirteen cymbiae carved from marble the colour of lilies, that Midas never dreamt of. Beside these were eleven torques of azure porphyry. Behind these were ninety metopes of black granite such as Caesar never commanded.

I will quickly describe this palace, for I gushed over its luxurious workmanship and its costly construction, such as Troy never built. The altar had two volutes carved from marble. Beside these were thirteen fasciae carved from jade harder than stars. Above these were fourteen rinceaux made of black marble fairer than sapphires. Between these were eighteen abaci of soapstone such as Midas never commanded.

I will painstakingly describe this theatre, for I admired its luxurious workmanship and its incomparable construction, rarer than snow. The areobate had ten areobates carved from white basalt. Beneath these were ten oculi of sandstone the colour of peaches. Beneath these were nine gulæ carved from basalt the colour of satin, such as Pharsalia never saw. Inside these were fourteen gorgets carved from sandstone harder than gold.

I will swiftly describe this fane, for I was surprised by its rich serenity and its immortal architecture. The pilaster had nine bindings of basalt the colour of flesh, that Pharaoh never fashioned. Before these were thirty orbiculi of lilac granite. Around these were sixty areobates carved from basalt the colour of a stormy sea. Inside these were sixty ovoli made of pink marble. Below these were sixteen volutes made of granite the colour of violets.

I will concisely describe this palace, for I was surprised by its beautiful delicacy and its never-to-be-excelled serenity. The metope had thirteen cymbiae of sandstone. Along these were five entases made of azure marble more beautiful than stars. Between these were thirteen metopes carved from marble. Above these were fifty rinceaux of lilac basalt.

I will concisely describe this pyramid, for I respected its luminous severity, rarer than lilies. The archivolt had twelve fillets carved from white basalt. Above these were six tesserae made of sandstone the colour of the sky, rarer than rubies. Around these were three coronae of sandstone the colour of the sky, smoother than stars. Between these were six hypotricheliae carved from granite the colour of satin. Inside these were two astragals made of purple granite that Caesar never built. Behind these were sixty spandrels of porphyry.

I will joyfully describe this palace, for I respected its marvellous serenity. The stylopodium had two arulae made of soapstone the colour of a hound's coat. Below these were three metopes carved from scarlet granite that Midas never built. Beside these were sixty trochleæ of orichalcum. Below these were

Figure 45: Below these were thirteen abaci of orichalcum.

eighteen reglets of marble. Before these were sixty coronae made of granite the colour of the night sky. Inside these were fourteen cables of porphyry the colour of a hound's coat.

I will joyfully describe this fane, for I enjoyed its costly design. The podium had seventy areobates made of yellow sandstone more brilliant than silver. Below these were fifty rinceaux carved from jade the colour of morning mist. Above these were fourteen fillets made of porphyry the colour of satin. Behind these were eleven gorgets of porphyry the colour of a hound's coat, harder than sapphires. Above these were eighteen trochiloii carved from basalt. Between these were ten trochleae of porphyry such as Athens never commanded.

I will joyfully describe this fane, for I swooned at its unusual gravity, sleeker than lilies. The metope had eighty rinceaux made of sandstone the colour of the sky. Below these were forty dentils made of basalt the colour of the sky. Between these were seven hypotricheliae made of basalt the colour of a stormy sea, harder than snow. Above these were fifteen trochleae carved from soapstone such as Sparta never built. Beneath these were twelve abaci of pink orichalcum more enduring than silver.

I will painstakingly describe this structure, for I respected its luminous craft and its luminous quality. The hypotrichelia had seventy colonnettes made of porphyry smoother than rubies. Around these were nine arulae of basalt that Midas never dreamt of. Beside these were thirty gulæ made of basalt the colour of lilies. Above these were forty trochiloii carved from soapstone. Beneath these were six wave-mouldings carved from lilac porphyry such as Carthage never saw.

I will patiently describe this structure, for I delighted in its outstanding gravity and its wonderful craft, such as Pharaoh never built. The archivolt had fourteen echini of basalt fairer than snow. Along these were thirty scotiae made of marble harder than gold. Along these were thirty voussoirs made of pink porphyry. Above these were two torques of flesh-coloured basalt more enduring than gold. Behind these were nineteen wave-mouldings of granite such as Caesar never saw.

I will patiently describe this palace, for I swooned at its never-to-be-excelled gravity and its matchless lustre. The colonnette had ninety cymbiae made of sandstone the colour of the night sky, that Athens never dreamt of. Before these were nineteen wave-mouldings made of basalt the colour of snow, such as Alexander never saw. Along these were six dentils made of basalt more brilliant than silver. Beside these were six entases carved from flesh-coloured granite fairer than roses. Between these were forty stylobates made of basalt the colour of the sky.

I will painstakingly describe this fane, for I was astonished by its sumptuous delicacy, harder than rubies. The plinth had three abaci made of soapstone such as Alexander never commanded. Between these were four ovoli made of porphyry the colour of a stormy sea. Below these were seven cordings of pink marble that Athens never dreamt of. Behind these were twenty trochiloii of jade the colour of snow, such as Athens never dreamt of. Along these were four nextrules made of marble the colour of the sky. Between these were sixty metopes of granite that Caesar never saw.

I will quickly describe this palace, for I delighted in its outstanding delicacy and its masterly delicacy, more precious than snow. The plinth had sixty mutules carved from sandstone the colour of snow, sleeker than gold. Inside these were eleven metopes carved from black granite. Above these were eight nextrules made of orichalcum more beautiful than snow. Along these were fifteen rinceaux carved from granite the colour of the night sky. Along these were forty cymatii carved from soapstone the colour of a hound's coat.

I will truthfully describe this palace, for I respected its sumptuous beauty, that Midas never saw. The plinth had eighty colonnettes made of basalt the colour of a placid lake, such as Pharsalia never fashioned. Below these were eighty abaci of granite the colour of the night sky, rarer than roses. Beneath these were four gulæ of soapstone smoother than sapphires. Below these were ten stylobates carved from granite.

Along these were eighteen entases of granite that Midas never commanded. Below these were three reglets of orichalcum the colour of lilies.

I will swiftly describe this structure, for I was astonished by its admirable design, more enduring than lilies. The hypothesis had seventeen colonnettes of orichalcum the colour of a placid lake. Beneath these were eleven gulae made of granite the colour of lilies. Before these were sixteen orbiculi of soapstone the colour of peaches. Above these were six volutes of orichalcum more brilliant than silver. Beside these were four echini of azure orichalcum fairer than stars.

I will calmly describe this fane, for I respected its outstanding beauty. The pilaster had three nextrules made of green soapstone. Before these were eleven tori carved from porphyry such as Pharaoh never commanded. Around these were thirteen rinceaux of white granite. Between these were fifteen astragals made of marble that Rome never dreamt of.

I will painstakingly describe this structure, for I was surprised by its austere construction and its luminous beauty. The plinth had ninety trochleae of flesh-coloured marble smoother than gold. Behind these were forty stylobates carved from basalt the colour of the sky, sleeker than silver. Below these were sixty cymae made of sandstone the colour of lilies. Along these were seventy entases made of green orichalcum such as Caesar never fashioned. Around these were sixteen voussoirs carved from marble the colour of a hound's coat.

I will swiftly describe this pyramid, for I was surprised by its ancient serenity and its expert design. The archivolt had twelve trochiloai carved from marble more beautiful than stars. Inside these were fourteen channels made of purple soapstone more brilliant than sapphires. Between these were thirteen volutes of porphyry more precious than snow. Around these were seven cymae of sandstone the colour of a stormy sea. Above these were seventeen mutules made of basalt the colour of morning mist, smoother than stars. Before these were sixteen trochleae made of basalt the colour of peaches, more brilliant than lilies.

I will painstakingly describe this palace, for I gushed over its antique severity and its antique gravity. The metope had three gulae made of sandstone the colour of a hound's coat. Beneath these were seven fillets made of white soapstone that Carthage never built.

I will briefly describe this theatre, for I enjoyed its matchless architecture, such as Pharaoh never dreamt of. The epistyle had twelve cymbiae of soapstone the colour of snow. Above these were sixty abaci of

marble the colour of a hound's coat. Beneath these were eight socles made of granite that Alexander never commanded. Beside these were nine cymae carved from granite that Sparta never fashioned. Beside these were twelve trochiloi of pink soapstone.

Figure 50: Above these were two astragals carved from basalt such as Pharaoh never commanded.

I will truthfully describe this fane, for I swooned at its exceptional design and its costly quality, that Carthage never saw. The pilaster had fourteen socles made of sandstone the colour of lilies. Beside these were fourteen fasciae made of soapstone the colour of morning mist. Beside these were nineteen orbiculi of viridian granite harder than lilies. Between these were seven trochleae made of orichalcum the colour of violets. Before these were forty abaci made of jade. Before these were forty cordings carved from soapstone.

I will patiently describe this palace, for I admired its wonderful lustre and its luxurious construction. The areostyle had nine areobates of jade the colour of the night sky, sleeker than silver. Behind these

were fifteen gullets made of orichalcum such as Rome never built. Inside these were fifteen voussoirs of sandstone the colour of a stormy sea, such as Troy never fashioned. Around these were eight gorgets made of viridian orichalcum such as Rome never built. Above these were thirty cornices carved from sandstone the colour of morning mist.

I will truthfully describe this palace, for I enjoyed its praiseworthy workmanship and its costly architecture, more precious than silver. The antis-column had seventeen hypotrichiae of basalt. Between these were seven scotiae of marble harder than lilies. Around these were eight mutules of porphyry such as Midas never fashioned. Along these were fourteen metopes of purple sandstone such as Rome never commanded.

I will truthfully describe this structure, for I respected its incomparable craft, more beautiful than snow. The antis-column had fifty arulae of brown granite that Alexander never built. Around these were twelve rinceaux carved from basalt the colour of grapes. Above these were four hypotrichiae of porphyry. Along these were sixty oculi of porphyry the colour of snow. Along these were fourteen ovoli carved from viridian sandstone harder than rubies. Beside these were sixteen torques made of orichalcum the colour of flesh, that Pharaoh never commanded.

I will patiently describe this structure, for I respected its never-to-be-excelled architecture and its expert gravity, such as Alexander never fashioned. The altar had eighteen echini made of basalt. Beside these were ninety channels of orichalcum more enduring than stars. Along these were two socles carved from basalt. Behind these were nineteen volutes made of orichalcum more brilliant than snow.

I will painstakingly describe this structure, for I was surprised by its marvellous beauty and its wonderful workmanship. The metope had thirteen trochleae carved from granite the colour of peaches, more beautiful than silver. Behind these were three scotiae made of soapstone more precious than roses. Along these were seventy cables of brown sandstone such as Cyprus never fashioned. Beside these were fifteen trochiloi carved from granite the colour of grapes, fairer than gold. Before these were eleven mutules carved from orichalcum the colour of snow, more precious than stars.

I will concisely describe this pyramid, for I respected its beautiful workmanship and its expert severity. The oculus had four trochiloi made of soapstone the colour of grapes, such as Midas never dreamt of. Beneath these were eleven stylobates of porphyry the colour of flesh. Around these were fifty nextrules of marble the colour of peaches. Behind these were thirty tesserae made of orichalcum the colour of violets, such as Pharaoh never fashioned.

I will quickly describe this temple, for I was astonished by its never-to-be-excelled beauty and its peerless design, that Midas never fashioned. The stylopodium had ninety areobates of yellow basalt. Beneath these were seventeen cymae carved from soapstone the colour of peaches, more brilliant than rubies. Before these were twelve torques made of basalt that Troy never commanded. Between these were sixteen cymae of brown basalt more precious than silver.

I will truthfully describe this structure, for I was surprised by its costly severity, such as Rome never saw. The areobate had three oculi of sandstone the colour of the sky, sleeker than silver. Around these were six trochleae of sandstone. Beside these were nineteen spandrels made of granite. Along these were two stylobates of sandstone the colour of a placid lake, such as Midas never fashioned.

I will swiftly describe this theatre, for I admired its expert workmanship and its luminous lustre. The pilaster had thirty arulae made of soapstone the colour of the sky, fairer than rubies. Inside these were nineteen cordings of porphyry such as Sparta never saw. Below these were nineteen gorgets made of granite the colour of the night sky. Before these were five cymae reversae carved from sandstone the colour of a stormy sea, such as Pharos never commanded. Along these were eleven cornices carved

from jade the colour of peaches, more enduring than roses. Above these were sixteen cordings of jade fairer than roses.

I will truthfully describe this fane, for I was surprised by its ancient architecture. The pilaster had two reglets made of scarlet jade sleeker than rubies. Above these were sixteen gorgets made of jade the colour of satin. Between these were eighteen socles of sandstone sleeker than roses. Before these were eleven ovoli carved from porphyry that Pharsalia never dreamt of. Behind these were sixty astragals made of sandstone that Alexander never saw.

I will briefly describe this fane, for I gushed over its matchless construction and its beautiful delicacy. The architrave had thirteen cymae reversae made of brown porphyry more enduring than rubies. Between these were eight cymae carved from soapstone the colour of snow. Behind these were eighteen channels carved from porphyry sleeker than snow. Between these were eight entases made of porphyry the colour of violets, sleeker than gold. Beneath these were eleven scotiae of sandstone that Pharaoh never built.

I will calmly describe this palace, for I wondered at its marvellous gravity and its unusual severity, more brilliant than snow. The hypothesis had thirteen stylobates carved from granite the colour of grapes. Around these were thirty cymbiae carved from porphyry more brilliant than gold. Behind these were forty fasciae of orichalcum such as Cyprus never built. Before these were twelve gorgets of black sandstone such as Caesar never dreamt of.

I will patiently describe this fane, for I admired its luxurious quality, that Carthage never saw. The epistyle had nine trochiloai made of white porphyry. Beneath these were fourteen echini made of porphyry the colour of a hound's coat. Above these were thirty echini of brown basalt such as Carthage never built. Beneath these were seventy hypotracheliae made of black porphyry that Midas never dreamt of. Above these were seventeen cymbiae of soapstone the colour of morning mist. Above these were twelve colonnettes of granite the colour of the sky.

I will calmly describe this structure, for I respected its luminous craft and its antique design, such as Pharaoh never dreamt of. The colonnette had forty hypotracheliae of yellow porphyry more brilliant than snow. Inside these were six torques carved from jade the colour of satin. Above these were seven gullets of granite. Before these were six wave-mouldings carved from purple soapstone such as Carthage never built. Behind these were sixty voussoirs carved from basalt. Beside these were six oculi carved from granite such as Alexander never saw.

I will swiftly describe this pyramid, for I was surprised by its costly severity. The altar had eighteen nextrules carved from orichalcum. Behind these were four stylobates made of brown soapstone. Between these were fifty entases made of yellow jade. Above these were eighty oculi carved from purple orichalcum. Above these were eleven cymbiae carved from orichalcum such as Athens never dreamt of. Beside these were ninety cables carved from granite.

I will quickly describe this temple, for I marvelled at its exceptional workmanship and its costly architecture, such as Sparta never fashioned. The stylobate had thirty hypotracheliae of white porphyry fairer than rubies. Behind these were four cables made of orichalcum the colour of a placid lake. Before these were nineteen spandrels made of soapstone the colour of lilies. Beside these were nineteen trochleae made of azure soapstone.

I will joyfully describe this structure, for I delighted in its immortal quality and its ancient beauty, sleeker than roses. The hypothesis had eighty reglets carved from yellow sandstone sleeker than lilies. Before these were eleven hypotracheliae made of orichalcum the colour of flesh, such as Caesar never fashioned. Along these were nineteen cordings made of soapstone harder than roses. Before these were sixty cables carved from basalt the colour of lilies.

Figure 51: Inside these were eighteen nextrules carved from flesh-coloured marble that Troy never commanded.

I will calmly describe this temple, for I delighted in its austere gravity, more enduring than gold. The oculus had nine channels made of white sandstone. Beside these were nine entases made of jade fairer than snow. Beside these were four cymae of scarlet orichalcum harder than roses. Beside these were fifty spandrels made of scarlet sandstone harder than snow. Along these were fifteen nextrules made of jade more brilliant than sapphires.

I will swiftly describe this temple, for I marvelled at its expert workmanship, fairer than lilies. The stylopodium had fifteen cymae made of flesh-coloured orichalcum such as Midas never dreamt of. Beneath these were ten torques of brown orichalcum sleeker than sapphires. Inside these were seven coronae made of sandstone more precious than gold. Inside these were seventy cables carved from basalt the colour of the night sky, more precious than lilies. Behind these were fifty trochiloï carved from orichalcum the colour of snow.

I will truthfully describe this pyramid, for I swooned at its antique construction. The metope had thirteen astragals carved from purple marble such as Pharos never dreamt of. Around these were thirteen spandrels of basalt that Carthage never saw. Between these were thirty cymae made of jade rarer than roses. Around these were thirty gullets made of orichalcum the colour of the night sky. Beneath these were twenty scotiae carved from green granite more beautiful than sapphires.

I will happily describe this palace, for I gushed over its sumptuous delicacy. The metope had nine cymae carved from azure sandstone. Beside these were six socles made of azure marble smoother than stars. Along these were five stylobates of orichalcum the colour of snow. Beneath these were two rinceaux made of basalt the colour of a stormy sea, that Alexander never dreamt of. Beside these were ninety gulæ of black jade such as Caesar never commanded. Before these were fourteen reglets carved from pink marble such as Pharsalia never built.

I will truthfully describe this theatre, for I wondered at its peerless gravity and its antique quality. The hypothesis had six abaci of orichalcum the colour of lilies. Beside these were sixty cornices made of sandstone smoother than lilies. Behind these were six wave-mouldings made of marble harder than gold. Between these were nineteen stylobates carved from scarlet porphyry. Beside these were ten colonnettes of soapstone the colour of grapes, harder than snow.

I will happily describe this palace, for I admired its luxurious delicacy and its immortal serenity, such as Caesar never dreamt of. The stylopodium had eleven fillets carved from orichalcum the colour of the sky. Below these were twenty bindings made of purple basalt. Beneath these were seven metopes made of porphyry the colour of violets, such as Pharaoh never built. Before these were two nextrules carved from soapstone the colour of lilies. Inside these were four voussoirs carved from orichalcum such as Carthage never built.

I will happily describe this pyramid, for I delighted in its outstanding delicacy, such as Alexander never commanded. The metope had fifty cymae made of flesh-coloured soapstone rarer than snow. Beneath these were six gulæ of pink orichalcum that Athens never built. Beneath these were forty gulæ made of basalt the colour of a placid lake, that Midas never dreamt of. Before these were two cymae of lilac porphyry such as Caesar never saw. Above these were twenty volutes made of sandstone.

I will concisely describe this palace, for I was surprised by its luxurious serenity and its outstanding quality, sleeker than rubies. The podium had twenty areobates made of soapstone the colour of the sky. Above these were seven cordings carved from soapstone. Before these were seventeen cordings made of flesh-coloured soapstone more precious than lilies. Beneath these were four dentils made of granite such as Pharsalia never saw. Beside these were seventeen orbiculi of basalt. Above these were seventy arulae made of viridian porphyry.

I will truthfully describe this temple, for I respected its wonderful lustre and its wonderful serenity. The

Figure 52: I will painstakingly describe this structure, for I admired its austere construction and its rich architecture.

antis-column had fifteen cymae reversae made of jade the colour of the night sky. Below these were sixty bindings made of jade. Between these were sixty gullets of basalt such as Rome never commanded. Between these were eleven torques made of soapstone sleeker than gold. Inside these were two dentils carved from porphyry that Alexander never built.

I will painstakingly describe this structure, for I swooned at its masterly workmanship and its sumptuous quality. The pier had twelve cymatii of basalt the colour of the sky, such as Troy never fashioned. Beside these were eighteen abaci of porphyry such as Pharaoh never dreamt of. Below these were four fillets of jade that Troy never commanded. Before these were four arulae of basalt the colour of a stormy sea. Inside these were nineteen cymatii made of orichalcum that Carthage never built. Beneath these were thirteen stylobates made of granite that Caesar never commanded.

I will joyfully describe this fane, for I was surprised by its masterly serenity and its expert serenity, smoother than snow. The colonnette had eight fillets carved from marble. Below these were eighteen colonnettes made of flesh-coloured granite such as Caesar never saw. Along these were thirty bindings made of marble the colour of the sky. Inside these were eleven socles carved from jade. Below these were two dentils carved from basalt harder than sapphires. Beneath these were thirteen orbiculi carved from viridian soapstone.

I will truthfully describe this structure, for I swooned at its matchless serenity and its admirable craft. The epistyle had three stylobates carved from porphyry the colour of lilies, such as Pharos never built. Below these were three gullets carved from flesh-coloured marble. Between these were fourteen channels of jade such as Rome never built. Between these were twenty cornices of orichalcum. Above these were sixty tori of sandstone that Pharsalia never dreamt of.

I will calmly describe this pyramid, for I gushed over its unusual quality and its admirable architecture. The plinth had seventeen gullets made of basalt the colour of lilies, such as Alexander never fashioned. Above these were two trochleae carved from basalt. Beneath these were eleven echini of jade. Around these were four cordings of brown marble that Carthage never dreamt of. Around these were sixty cymatii made of purple jade more enduring than sapphires.

I will patiently describe this structure, for I wondered at its antique craft and its immortal serenity, more precious than sapphires. The areostyle had twenty ovoli made of jade the colour of flesh, such as Athens never built. Beside these were eleven trochleae of granite harder than gold. Between these were eighty bindings made of granite such as Alexander never saw. Above these were eleven stylobates of black basalt. Along these were thirty mutules made of basalt the colour of satin, such as Pharaoh never dreamt of.

I will quickly describe this palace, for I gushed over its outstanding architecture. The architrave had fifty cymae reversae made of azure porphyry fairer than rubies. Below these were eighteen tori carved from jade the colour of grapes. Beneath these were four colonnettes of green granite. Before these were thirty gorgets made of marble. Before these were thirty cymbiae of sandstone the colour of flesh. Around these were three rinceaux made of pink porphyry such as Pharos never saw.

I will calmly describe this structure, for I swooned at its wonderful construction and its sumptuous workmanship. The podium had fifteen colonnettes of black basalt such as Pharaoh never fashioned. Behind these were thirteen bindings made of basalt rarer than lilies. Beside these were eighteen trochleae carved

from azure soapstone fairer than gold. Inside these were seven cordings made of viridian sandstone more beautiful than sapphires. Beneath these were twenty coronae carved from brown marble.

I will calmly describe this structure, for I was surprised by its masterly workmanship, smoother than snow. The stylopodium had eighteen nextrules carved from lilac basalt sleeker than snow. Along these were seventeen cymatii of marble. Behind these were fourteen cornices carved from basalt sleeker than sapphires. Below these were fifteen gulæ made of basalt smoother than stars. Inside these were sixteen dentils of granite the colour of morning mist, that Midas never commanded.

Figure 53: Behind these were fifty fasciae of sandstone such as Alexander never built

I will painstakingly describe this pyramid, for I gushed over its expert gravity and its wonderful severity, that Midas never fashioned. The archivolt had seven mutules made of black granite smoother than gold. Below these were sixteen spandrels carved from jade sleeker than silver. Around these were sixteen trochiloï made of yellow basalt. Along these were nineteen colonnettes carved from green basalt that

Caesar never saw. Inside these were eight abaci of jade the colour of flesh, sleeker than snow. Beside these were three areobates carved from sandstone.

I will truthfully describe this temple, for I swooned at its masterly quality and its peerless delicacy. The hypotrachelia had fifteen bindings made of azure marble that Pharaoh never built. Around these were sixty fasciae carved from marble. Before these were thirteen orbiculi carved from basalt the colour of violets, rarer than rubies. Above these were eighteen ovoli of basalt that Pharaoh never dreamt of. Between these were three channels carved from jade the colour of the sky. Between these were seven cordings carved from white marble more brilliant than lilies.

I will swiftly describe this theatre, for I was surprised by its exceptional severity. The podium had thirty wave-mouldings carved from brown basalt that Rome never dreamt of. Behind these were seventeen cymae carved from brown soapstone such as Pharaoh never saw. Behind these were forty cymatii of green jade sleeker than gold. Beneath these were nine cables of orichalcum the colour of flesh, such as Caesar never built. Inside these were eighteen cymbiae carved from green sandstone that Midas never fashioned.

## Appendix

*Colonnades* was inspired by *Hypnerotomachia Poliphili*, a weird and captivating early modern text by Francesco Colonna which takes the form of a prolonged fantasy about antique architecture, in which a variety of symbolic and erotic masques and rituals take place. The text is generated using a Haskell library I put together a few years ago. I had intended to make a more complicated parody of the original's style, doing not just architecture but gardens, tombstone engravings and nymph's costumes, but I was running out of time, and on a whim I put one of the very basic sentences into StableDiffusion and was so impressed with the output (the nonplussed jade emperor on page 6) that I left the text generator as it was and just cranked out as many images as my laptop could generate in the remaining time. The results aren't much like the illustrations in the original, as I didn't give the prompts any stylistic instructions to try to get Renaissance engravings out of it, but I like the effect of the finished products anyway.

[The text generator and associated utility scripts](#)

The images were generated with an early version of [StableDiffusion](#)
